Indicative List of Data Sources	79
Appendix – 2	81
Pre-Qualification Criteria Compliance Checklist. The Last column to be filled by the Bidder and to be submitted.	81
Technical Qualification Criteria Compliance Checklist. The Last column to be filled by the Bidder and to be submitted.	85
Appendix – 3	90
Form 1: Letter of Technical Proposal Submission Form	90
Form 2: Format for Power of Attorney for Signing Proposal	91
Form 3: Certificate of Incorporation	92
Form 4: Format for Financial Turnover	93
Form 5: Format of Project Citation	94
Form 6: Curriculum Vitae (CV) of Key Experts	95
Form 7: Format for Non-Blacklisting Certificate	97
Form 8: Format for Non-Disclosure Agreement	98
Form 9: Format for Resource Strength	102

Form 10: Description of Approach and Methodology in response to the Terms of Reference	103
Form 11: Format for Bank Guarantee	104
Appendix- 4	106
Format for Financial Bid Cover Letter	106
Financial Proposal Template	107
Annexure -1 (SUT)	109
Annexure -2 (Format of Pre-Bid Query)	110

Disclaimer

This Request for Proposal ("RFP") is issued by the Ministry of Statistics & Programme Implementation (MoSPI). The objective of this document is to solicit technical and financial offers from the parties interested in carrying out the scope of work as mentioned in this document. While this document has been prepared in good faith, no representation or warranty, express or implied, is or will be made, and no responsibility or liability will be accepted by MoSPI or any of their employees, advisors, or agents as to or in relation to the accuracy or completeness of this document and any liability thereof is hereby expressly disclaimed.

Interested Parties may carry out their own study/ analysis/ investigation as required before submitting their proposals.

This document does not constitute an offer, or solicitation of an offer, nor does this document or anything contained herein shall form the basis of any agreement or commitment whatsoever.

MoSPI representatives, its employees and advisors make no representation or warranty and shall incur no liability under any law, statute, rules, or regulations as to the accuracy, reliability, or completeness of this document.

Activities listed in this RFP to be carried out by MoSPI after the receipt of the responses are indicative only. MoSPI has the right to continue with these activities, modify the sequence of activities, add or remove activities, as dictated by the best interests of MoSPI.

Invitation

MoSPI invites Proposals/ Bids for onboarding an Agency for **Automation of Operational Workflows and Centralized Data Management System for the National Accounts Division** as per the scope of work defined in this RFP. The Bidders/Applicants desirous of taking up the project are invited to submit their Proposal/Bid in response to this RFP. The Bidders/Applicants should have the necessary experience, capability, and expertise to perform, as per the terms and conditions outlined in this RFP. The RFP is not an offer by MoSPI, but an invitation to receive responses from the potential Bidders. No contractual obligation whatsoever shall arise from the RFP process unless and until a formal contract or work order is offered by duly authorized official(s) of MoSPI with the successful bidder.

Factsheet

S.No.	Particulars	Details
1.	Assignment Title	Request For Proposal (RFP) for Engagement of Agency for Automation of Operational Workflows and Centralized Data Management System for the National Accounts Division
2.	Purchaser details	National Accounts Division (NAD), Ministry of Statistics and Programme Implementation (MoSPI), Government of India (Contact Details: 011- 23455429, Email: ddg3.nad@mospi.gov.in)
3.	Location	New Delhi, India
4.	Bid Submissions	Through GeM portal
5.	Method of Selection	Quality Cum Cost Based Selection (QCBS) (Technical: 70, Financial: 30)
6.	Consortium / Subcontracting	Not Allowed
7.	EMD	Rs. 60,00,000/- (INR Sixty Lakh Rupees only) in the form of Bank Guarantee.
8.	Performance Security/Bank Guarantee	5% of the contract/WO value discovered through tender process for this RFP
9.	Tender Availability	GeM portal and at the tender section of MoSPI website
10.	Date of publication of the RFP document	01.09.2025
11.	Pre-Bid Meeting	10.09.2025 (15:00 Hrs IST) at K.L Bawan, Janpath, New Delhi -110001
12.	Bid validity	180 days from last date of submission of the bid.
13.	Bid submission	As per GeM bid requirement
14.	Last date of submission of queries	08.09.2025 (15:00 Hrs IST) (As per attached format in <u>Annexure -2</u>) on GeM Portal only
15.	Language of bid	The bid should be submitted in English only

S.No.	Particulars	Details
16.	Last date of submission of bid	25.09.2025 (15:00 Hrs IST)
17.	Opening of Technical Bids	25.09.2025 (17:00 Hrs IST)
18.	Technical Presentation, Opening of Financial Bids & Issue of Work Order	To be intimated to qualified bidders.
19.	Duration of Contract	5 Years (2 years of development + 3 years of O&M)

Important Dates Table

S.No	Detail of Activities	Target Date and Time
1.	Date of publication of the RFP document	01.09.2025
2.	Last date of submission of queries	08.09.2025 (15:00 Hrs IST)
3.	Pre-Bid Meeting	10.09.2025 (15:00 Hrs IST)
4.	Last date of submission of bid	25.09.2025 (15:00 Hrs IST)
5.	Opening of Technical Bids	25.09.2025 (17:00 Hrs IST)
6.	Technical Presentation, Opening of Financial Bids & Issue of Work Order	To be intimated to qualified bidders

Key Definitions

1. Client means the Ministry of Statistics & Programme Implementation (MoSPI) who has invited bids for the project, with whom the selected Bidder signs the Contract for the Services and to whom the selected Bidder shall provide services as per the Terms and Conditions and Scope of Work of the contract.
2. Bidder means any entity registered under the relevant statute who have been invited to submit their proposals that may provide the Services to the Client under the Contract.
3. Day means calendar day.
4. Government means the Government of India.
5. LoI means the Letter of Intent issued by the Client to the selected bidder/Bidder.
6. Personnel means professionals and support staff provided by the Bidder and assigned to perform the Services or any part thereof.
7. Proposal means the Technical Proposal and the Financial Proposal.
8. RFP means the Request for Proposal prepared by the Client for the selection of the Bidder.
9. Assignment/job means the work to be performed by the Bidder pursuant to the Contract.
10. Onsite means the office of National Accounts Division, MoSPI, New Delhi

Acronyms

ADB	Asian Development Bank
AES	Advanced Encryption Standard
AMC	Annual Maintenance Cost
ASI	Annual Survey of Industries
PBG	Performance Bank Guarantee
CEA	Central Electricity Authority
CMS	Content Management System
COFOG	Classification of the Functions of Government

TLS	Transport Layer Security
TRAI	Telecom Regulatory Authority of India
UAT	User Acceptance Testing
UNSD	United Nations Statistics Division
UT's	Union Territories
VAPT	Vulnerability Assessment and Penetration Testing
WO	Work Order
WPI	Wholesale Price Index

1. Organization Background

The National Accounts Division (NAD) functions under the Ministry of Statistics and Programme Implementation (MoSPI), Government of India. The division coordinates with more than 300 data sources which includes central ministries, state departments, regulatory bodies, autonomous bodies, PSU's and various other stakeholders.

1.1. Roles and Responsibilities of NAD

- a) Preparation of national accounts, which includes the estimates of Gross Domestic Product (GDP), National Income, Government/Private Final Consumption Expenditure, Capital Formation and Savings along with details of transactions of institutional sectors.
- b) Bringing out annual publication 'National Accounts Statistics'.
- c) Providing technical guidance and support to the State/UT Directorates of Economics & Statistics (DESS) on compilation and release of State Accounts, including estimates of State Domestic Product. State level estimates of GVA and GFCF in respect of supra-regional sectors, viz., Railways, Communication, Banking & Insurance and Central Government Administration.
- d) Liaison with international organizations like UNSD, IMF, ADB, World Bank, etc. on national accounts matters.
- e) Preparation and release of SUT and IOTT from time to time.
- f) Setting up of Advisory Committee on National Accounts comprising eminent economists, statisticians and other experts, including Departmental representatives, to look into and advise on all methodological aspects of compilation and dissemination of national accounts, base year revision and back series calculations.
- g) Discussions with the staff of IMF on GDP compilation as per guidelines under Article IV of the IMF Articles of Agreement.
- h) Coordination with Ministry of Finance and other line Ministries/Departments, RBI, NITI Aayog, TRAI, Finance Commission of States and UTs, etc. on compilation and dissemination of National accounts statistics.
- i) Handling RTI, Parliament Questions (Rajya Sabha & Lok Sabha), Parliamentary Assurances, VIP references, Cabinet Secretariat / PMO Matters, Complaints, Public Grievances, Budget matters including Outcome/Performance Budget, Audit and Court Cases related matters relating to the Unit/Division.

1.2. List of units at NAD

The following functional units are performing the afore-mentioned roles and responsibilities:

S.No.	NAD Unit	Functions
1	Agriculture	Estimates GVA and GVO for crops, livestock, forestry & fisheries. Gathers data from MoA, DESAg, FSI etc. Majority of data is received in Excel format with some being in PDF format.
2	Consumption of Fixed Capital, Gross Capital Formation, and miscellaneous estimations	The investments support production capacity and infrastructure, and are compiled using corporate filings, government budgets, and industry surveys.

3	Construction	Estimates GVA from construction activity. Utilizes data from private firms (MCA) and PSUs, additionally Integrates cement, steel, and investment indicators. Supports both annual and quarterly estimates.
4	Electricity, Gas, Water Supply and Remediation	Collects PSU data for electricity, gas, and water supply sectors. Sources include Central and State Departments, NSS Surveys, MCA data, the CEA, and autonomous bodies such as the KVIC. GVA and GVO are calculated at current and constant prices.
5	Gross Fixed Capital Formation	The GFCF Unit focuses on estimating capital investments made in fixed assets such as buildings, machinery, and equipment.
6	Manufacturing	Uses MCA and PSU data to estimate manufacturing GVA. Applies production approach and IIP for quarterly estimates. The unit utilizes external data sources such as the IIP and the WPI extracted through online portals. Shares with multiple units at NAD.
7	Mining and quarrying	Uses Indian Bureau of Mines for production and prices. IIP and mineral output support quarterly updates. Ensures sector accuracy. Subsequently, input rates are used to derive the GVA from the GVO. The data is received in both PDF and Excel formats.
8	AE/QE	Consolidates sectoral data for GDP estimation. Ensures SNA compliance and benchmarks with key indicators. Publishes Q1-Q4 GDP, aligns quarterly with annual targets, and maintains consistency for trend analysis. The data is organized on a quarterly basis by breaking down the annual estimates from previous years to project the values for the current financial year.
9	Non-Financial Non-Departmental Enterprises	Extracts financial data from around 2,200 Public Sector Undertakings (PSUs) for estimating GVA, investment, and savings. Sources data from Annual Reports and the Department of Public Enterprises survey. Uses standardized Excel-based toolkits to process and validate the data. Collaborates with the Non-Financial Private Corporation Unit to support national accounts compilation and prepares state-wise PSU estimates for integration into the economic accounts.
10	Financial Corporation	Collects financial data from RBI, NABARD, MCA, banks, insurance firms, and cooperatives. Uses standardized toolkits for analysis. A total of 292 variables are accounted, based on SNA codes. Currently working on excel based toolkits (VBA). CFC data is taken from PoSB and PLI from Savings unit. Provides data to the following units: SDP, Savings, PFCE, DE, AE/QE.
11	General Government; Public Administration and Defense	Collects public sector finance data for GVA. Uses budget documents, public accounts. General Government covers the following components: Government Controlled NPISH, Centre and State Governments, Rural /ULB's,

		Autonomous Bodies, Social Security Funds, Cantonment Boards. Economic codes. Purpose codes are mapped according to the classified items. MS Access and Excel are used to process the data in the unit.
12	Non-Financial Private Corporates (NFPC)	Processes MCA data (MGT-7/7A forms). Uses SPSS and manual validation. Supports GVA estimation in multiple sectors.
13	State Domestic Product (SDP)	Prepares GSDP for supra-regional sectors (Railways, Central Govt, etc.). Allocates national data to states. Uses IRASS, zone-level reports. Applies Labour Input method for informal sector.
14	Private Final Consumption Expenditure Unit	Estimates household and NPISH consumption. Coordinates internally for data on output, imports, and use. Computes PFCE at constant/current prices using Excel.
15	Non -Financial Services	Compiles GVA and GVO for various service sectors including real estate, legal, IT, and professional services. Estimates imputed rent for owner-occupied dwellings using market rental rates and housing stock data sourced from NSSO, Census of India, and municipal records. Also handles sectors like Trade, Repair, Hotels & Restaurants, Transport, Communication, Storage, and Broadcasting by collecting data in Excel/PDF formats from relevant ministries.
16	National Account Statistics	The NAS Division prepares key economic data like GDP, savings, and investments. It collects and compiles data from different sectors (government, households, companies) and ensures all estimates follow global standards. This helps in understanding the country's overall economic performance.
17	Savings	The Savings Unit is responsible for estimating savings across different institutional sectors, including households, private corporations, and the general government. It gathers data from various sources such as RBI reports, budget documents, MCA filings, and NSSO surveys. The unit calculates both gross and net savings in line with the SNA framework and supports macroeconomic planning by analyzing sector-wise savings trends.
18	Supply and Use Tables	Compiles Supply-Use Table annually. Uses toolkit with validations for consistency. The Supply and Use data must be aligned and any imbalances are adjusted to ensure consistency. Majority of data is received in Excel format and GST data is being downloaded in PDF format through online channels.

1.3. Existing Ecosystem and Processes

The data at NAD is sourced from annual/quarterly datasets, periodic benchmark surveys, central bodies, DES and other sources. Data is received from multiple sources (in different

formats e.g. PDF/Excel/Scanned Documents/CSV etc.) having variety of indicators and parameters. The data is sanitized and cleansed by converting it into standardized format. The estimation and compilation are done afterwards based on the three approaches (production, expenditure and income). The key outputs are generated in the form of National Account Statistics (NAS), annual and quarterly estimates, state level GSDP/NSDP/Per-capita income, Supply use Tables and Input-Output Transaction Tables. Data integration and interoperability between multiple units at NAD help in seamless analysis and compilation of GDP estimates. The data is disseminated via press releases, data portal and various publications released by MoSPI.

It is to be noted that, in course of time MoSPI is planning to revise its base year (2011-12) and tentatively 2022-23 will be taken as base year in the base year revision exercise. Therefore, sectoral estimates may have to be revised wherever possible according to the approach adopted.

The flowchart below is an illustration of the indicative data workflow for the National Accounts Division (NAD).

Figure 1: Indicative Data Workflow of NAD (1)

Figure 2: Indicative Data Workflow for NAD (2)

2. Objectives

- a) Automated end to end workflows and processes – Design, Develop and Implement automation for the full data lifecycle—collection, ingestion, processing, validation, computation (e.g., GDP aggregates), and dissemination—removing the need for manual interventions.
- b) Implement modular and scalable architecture – Develop solution with combination of smaller, independent, and interchangeable modules that can be tested individually. The proposed solution shall enable the system to handle increasing load, traffic or data without compromising performance.
- c) Establish a unified, centralized and secure data platform – Develop and Implement a centralized data repository hosted on the Government Cloud that consolidates historical and current datasets from all sources **(Attached in Appendix-1)**.
- d) Enable secure data sharing and RBAC – Implement Identity Access Management (IAM) and resource server that enables secure data sharing for data entry, validation, compilation, and analytics, configurable at dataset, department, dissemination levels etc. for different user roles.
- e) Support interoperability across Ministry and Systems – The system should be able to interact and ingest data from internal and external stakeholders and designed accordingly.
- f) Integrated analytics and monitoring capabilities – BI tools and analytical dashboards should provide customizable (automated report generation in various formats) reports and track key indicators both at micro and macro level.

3. Scope of Work

The engagement focuses on developing an integrated automated system for seamless compilation, processing and validation of data for GDP calculation while maintaining the highest standard of accuracy and compliances. The selected Bidder will be responsible to gather user requirements, design, develop, implement, operate, and maintain the automated system, its modules and dashboards while maintaining data inter-linkages with multiple stakeholders. There will be two phases of the project: **The development Phase will be a total of 24 months followed by 36 months of O&M.**

3.1. Functional Requirements

Based on the assessment carried out by the Bidder, FRS and SRS would be prepared regarding each unit at NAD supported by wireframes and mock-ups (4-5). The document would require comprehensive understanding of requirements at Micro and Macro level to attain the desired output.

3.1.1. Data Ingestion, Collection and Storage

The following points (but not limited to) are required to be addressed by the selected Bidder under this engagement:

- a) Supports importing data from Excel, CSV, PDF, APIs, and web scraping.
- b) Enables automated, secure, element-based data collection from internal and external sources, including XBRL, emails, file uploads, and web portals.
- c) Performs regular web crawling and uses configurable parsers for structured and unstructured data.
- d) Applies hygiene checks and maintains audit trails for traceability.

- e) Maps all incoming data to a centralized database designed for efficient querying, analysis, and reporting.
- f) Utilizes modular, low-code/no-code components for onboarding new data sources.
- g) Supports varied protocols and allows flexible augmentation or removal of data sources.
- h) Employs optimized storage mechanisms with compression for different use cases.
- i) Includes a centralized cloud repository (data lake, warehouse, and data marts) with bidirectional data pipelines.
- j) Designs scalable storage layers and ETL pipelines for raw and processed data.
- k) Migrates legacy data (Excel, SPSS, Access) in bulk with automated validation and cleansing.
- l) Handles diverse data formats from standard databases and maintains a data inward register.
- m) Ensures high performance and reliability of the database infrastructure.

3.1.2. Data Processing

The following points (but not limited to) are required to be addressed by the selected Bidder under this engagement:

- a) Accurately computes macroeconomic aggregates using NAD's standard methodologies, which involve complex, cross-functional relationships.
- b) Supports data handling across multiple frequencies (monthly, quarterly, bi-annually, annually) and variables (indicators, categories, classes).
- c) Applies configurable logic including lookup tables, formulas, algorithms, and mathematical calculations tailored to NAD unit requirements.
- d) Automates dataflows from source systems to the data warehouse, with capabilities to detect schema changes and assess downstream impacts.
- e) Enables real-time anomaly detection and alerting via operational dashboards.
- f) Integrates advanced big data technologies such as Text Mining, Natural Language Processing (NLP), and Artificial Intelligence (AI).
- g) Supports high-performance text analytics for processing large volumes of data efficiently.
- h) Deploys a staging layer within a big data environment for scalable ingestion and processing.
- i) Designs and delivers a robust Data Lake architecture alongside the conventional data warehouse, leveraging expertise in big data implementations.
- j) Supports open-source tools like R, Python, and other interoperable applications for Data Lake operations.
- k) Implements data masking for confidential elements as identified by NAD, ensuring privacy and security.
- l) Provides a user-friendly, screen-based interface for metadata creation, editing, and management.
- m) Includes a configurable data input module allowing NAD officials to update processing logic as needed.

3.1.2.1. Types of file processing required at NAD:

a. Excel/CSV File Processing

- i) Support .xls, .xlsx, and .csv formats.
- ii) Automatically detect and ingest data across worksheets and multiple files.
- iii) Provide preview and edit functionality before final ingestion.

- iv) Identify items, categories, and parameters using predefined formulas and Excel toolkits.
- v) Enable batch processing for large and multiple files.
- vi) Convert existing Excel workflows (macros, formulas) into ETL automation scripts.
- vii) Integrate business process re-engineering into the Data Warehouse using modern architecture.
- viii) Preserve NAD's toolkits, formulas, and macros in an automated manner.

b. PDF File Processing

- i) Text extraction capabilities of the system must preserve the logical flow of information while handling varied PDF layouts including, multi-column formats, headers, footers etc.
- ii) The tables should re-construct exactly along with text positions as the source document.
- iii) The extraction should be able to identify commas, separators, spaces from the source text to maintain maximum accuracy and data integrity.
- iv) Quality assessment mechanism should alert the user on low-confidence extractions for manual review.
- v) Use OCR and AI tools to digitize incoming PDFs, auto-parse field values, and flag inconsistencies.
- vi) A preview and edit feature should be provided before the final insertion is made.

c. Email

- i) The proposed automation solution shall include a robust RPA component specifically designed to ingest, parse, and extract structured and unstructured data from inbound emails and associated attachments.
- ii) The RPA robots must interface seamlessly with the NAD's email systems, apply configurable extraction rules, perform validation, and feed cleaned data into downstream applications or databases.

d. Web Forms

- i) Form data extraction involves identifying and extracting information from structured forms including checkboxes, radio buttons, text fields, and signature blocks. The system should handle both filled and unfilled forms and maintain the relationship between form field labels and their corresponding values.
- ii) The integration between the system and input from web forms should correspond to standardised format as per requirement of each unit in NAD.

e. API Integrations

- i) Allow preview of data before API-based insertion into the database.
- ii) Securely store API credentials and maintain audit trails for all access.
- iii) Implement rate limiting and error handling to ensure data integrity and prevent overload.
- iv) Automate data ingestion from Excel and email attachments with retry mechanisms.
- v) Use a metadata-centric ETL approach to capture source/target structures, support impact analysis, and manage schema changes.
- vi) Reimplement Excel macros/formulas (e.g., price estimation) in backend code or database procedures.
- vii) Schedule ingestion and processing tasks using cron jobs or Airflow DAGs.

- viii) Log all steps (success, failure, data quality) and generate dashboards or reports.
- ix) Use Git for version control and automate script testing and deployment.
- x) Maintain an Operational Data Store (ODS) for real-time reporting with frequently updated snapshots.
- xi) Support archival of structured/unstructured data, source files, data warehouse, ODS, data marts, reports, and dashboards.
- xii) Support of providing a south bound interface through which any data producing agency can ingest data using their interface.

The system should be integrated with the following tasks (not limited to) that are required for processing of data by various units:

- a) Interlinkages of Input and Output Calculations within units of NAD should be maintained into the new system.
Indicative Example: Unit 1: Manufacturing unit, Construction Unit, SDP Unit. Fixed capital data is compiled by manufacturing unit and shared with construction unit for their input and review. The data from construction unit is shared back to manufacturing unit with their input which in turn is incorporated by SDP unit as their output.
- b) The system should be able to assign data on all India level data to individual states based on specific ratios used for calculation by certain units of NAD.
- c) All toolkits (Excel, MS Access, SPSS) should be transported to the new system without discrepancies and error. All these toolkits have to be integrated together for input and output of data by various units of NAD.
- d) Output for one unit can be the input for another (Back and forth movement).
- e) The system should have a structured and well-defined system to integrate GST data which is analyzed using the (R) programming language and MCA data which is processed in SPSS software.
- f) The system should be able to receive datasets from external agencies through a standardized format to interact with the units at NAD.
- g) The portal shall include an integrated analytical toolkit module to facilitate the analysis of NSO survey datasets such as ASUSE, PLFS, AIDIS, HCES, etc., for use in GVA compilation.
- h) The selected Bidder shall provide a comprehensive Toolkit for Survey Data Analysis as part of the project deliverables. This toolkit must enable efficient ingestion, processing, analysis, and visualization of survey data collected from multiple sources, including structured, semi-structured, and unstructured formats.
- i) Provision of balancing interface is required in SUT datasets. The system should also integrate tools to edit unbalanced SUT's to achieve balanced tables. ([Attached in Annexure -1](#))

3.1.3. Data Validation

The following points (but not limited to) are required to be addressed by the selected Bidder under this engagement:

- a) The system should detect changes in source schemas, propose necessary modifications, and preserve backward compatibility during transitions.
- b) The system should ensure detection and resolution mechanisms for duplicate field and error handling.
- c) The portal should provide data export services (e.g. bulk downloads) and implement rule-based checks related to any anomalies detected.
- d) Automated alerts should be sent if validations fail, or data thresholds are exceeded.

- e) Incremental loading should use change detection mechanisms such as timestamps, version numbers, or hash comparisons to identify modified records.
- f) Error recovery should include the ability to resume failed loads from checkpoints and handle partial failures gracefully.
- g) The Bidder is required to document, implement and enhance all the validations currently being used in Excel and other statistical toolkits.
- h) Analyse the existing Excel-based toolkits (which include built-in formulas, macros and data validation for GDP estimates, price adjustments, etc.) and implement equivalent computation modules.
- i) The key outputs derived in NAD are GVA and GVO at current and constant prices. For example, MoSPI's GDP methodology uses price indices to compute constant-price estimates ("estimates at constant prices are arrived at by deflating the current price GVA estimates by suitable price indices"); these deflation formulas must be encoded into the new system so that all current/constant price calculations continue seamlessly.
- j) Preserve all critical calculations and checks from the spreadsheets.
- k) Implement workflow automation to eliminate manual handoffs. Replace email/Excel forms with standardized web forms or direct API submissions for data collection processes.
- l) Automate notification and approval steps so that data, once submitted, triggers automatic validation routines and alerts of missing values or discrepancies.
- m) The system should deal efficiently with duplicate data. Recommendations should be given for identifying the duplicate data and ways for terminating its further processing.
- n) The architecture should cater to efficient addition and removal of tags for each individual data element. Each data element can have multiple tags for easy searchability. Apart from auto-tagging, there should be a facility to tag incoming ingested data elements manually. Existing data elements can also be searched and re-tagged manually.
- o) Users should have the ability to generate and download an "Offline Data Cube" containing all data series they are authorized to access. This offline package should be installable via a menu option, allowing users to copy it to their laptops for use without internet connectivity.
- p) The following validation points (but not limited to) would require in-depth analysis to maintain uniform data structure across datasets:
 - i) **Unit Metrics:** Data received from various state department and external sources may not use the same metrics as NAD. (E.g.: State department might share data in thousand lakh and NAD uses crores as the currency figure to depict prices). The system should be able to have a standardized template of automatic conversion when the source data is ingested into the system.
 - ii) **Filtration & Selection:** There might be multiple indicators used within the division and externally which won't be required by a particular unit to carry out a certain operation. The unit should have a parser to filter out the indicators/categories required to be used for that particular task.
 - iii) **Conditional Formatting:** As an example, NULL column should automatically populate data based on logic provided beforehand to avoid any discrepancy. (e.g. Average of last 3 years can be taken as an input for the "Null" cell value as an estimate). Also, a manual editing feature should be accompanied, to tweak input as per unit requirements.

3.1.4. Metadata Management

The selected Bidder will be accountable for the design, development, and deployment of a robust Metadata Repository as an integral component of the proposed solution. This repository will function (not limited to) as a centralized, well-structured platform for the storage, management, and retrieval of metadata associated with all datasets, processes, reports, and data sources within the project's operational framework.

- a) The repository shall be developed using industry-standard metadata frameworks (e.g., ISO 11179, Dublin Core, or equivalent) and must support custom taxonomies, data dictionaries, and classification schemes as defined by the Client.
- b) The system must support capture and maintenance of the following categories:
 - i) Technical metadata (data types, data formats, schema, lineage, etc.)
 - ii) Business metadata (definitions, ownership, usage policies)
 - iii) Operational metadata (data processing history, refresh cycles, logs)
 - iv) Security and access metadata (data classification, sensitivity, role-based access).
- c) The metadata repository must be able to interact with existing data storage and processing systems to automate metadata extraction (e.g., from databases, ETL pipelines, APIs, or Excel files).
- d) The solution must provide intuitive search and browse functionality for users to discover metadata assets and their relationships. Visualization of data lineage and relationships is preferred.
- e) The repository should include mechanisms for metadata approval workflows, audit trails, version history, and role-based access to ensure compliance and governance.
- f) The suggested solution shall incorporate a strong Business Glossary feature within the metadata management framework. The Business Glossary will act as a centralized resource for domain terminology and definitions utilized throughout the organization. It must support role-based ownership and stewardship, version control, and audit trails to ensure accountability and traceability. The glossary should be integrated with metadata repositories and data assets, allowing linkages between business terms and underlying technical components such as databases, reports, or APIs. It should also include features for search and discovery, support for synonyms and classifications, and enable collaborative workflows for review and approval.
- g) The metadata repository must comply with relevant data governance and interoperability standards mandated by the Client or applicable government regulations.
- h) The Bidder shall provide complete technical and user documentation, along with training for relevant stakeholders on how to maintain and utilize the metadata repository.

3.1.5. AI/ML Integration

- a) The solution must include AI/ML capabilities to automatically identify, extract, and structure data from diverse sources (e.g., scanned documents, PDFs, spreadsheets, APIs, and unstructured text).
- b) AI-based algorithms must be used to classify incoming data by topic, source, or domain, and apply relevant tags or metadata for efficient organization and retrieval.
- c) AI models shall be deployed to assess data quality, detect anomalies, missing values, and inconsistencies, and flag outliers or suspicious patterns for review.
- d) The system must support both rule-based validation and machine learning models that learn from historical data to predict and flag invalid or unlikely values.
- e) The platform should use AI to automate transformation rules (e.g., unit conversion, format standardization) and intelligent mapping between disparate schemas or formats.

- f) AI techniques should be employed to reconcile data across multiple sources, detecting duplicates and merging records with similar attributes.
- g) The AI components should have the ability to learn from feedback and historical data, improving the accuracy and efficiency of ingestion and validation over time.
- h) All AI-driven actions must be transparent, with detailed logs explaining how a decision (e.g., rejection, classification, flagging) was made.
- i) AI modules must seamlessly integrate with the organization's existing data lakes, warehouses, ETL tools, and dashboards through APIs or connectors.
- j) The proposed solution must provide Natural Language Processing (NLP) and Generative AI capabilities and ensure AI readiness for use cases identified during the development and O&M phase of the project. Few indicative use cases are outlined below:
 - i) Data Validation, Data Ingestion, Forecasting of the indicators/Nowcasting.
 - ii) Data extraction from documents.
- k) The system should incorporate a feedback mechanism allowing users to validate or correct AI outputs, which in turn should be used to refine models.

3.1.6. Conversational AI Chatbot

The selected bidder shall develop and execute a secure, web-based conversational AI chatbot solution that should be available to authorized internal users (NAD, officials, statistical officers, data entry operators) and must comply with the following requirements and deliverables:

- a) The selected bidder will create and train the chatbot's NLP model utilizing the data and information through historical datasets and information presently available at NAD. The chatbot should comprehend concepts related to GDP calculation and economic indicators, and be adjusted with business-related data (e.g., GDP compilation rules, definitions of indicators) to provide accurate, context-sensitive answers. The outcomes should consist of a trained dialogue model and relevant training data sources.
- b) The selected bidder will connect the chatbot to the organization's data ingestion system. It should accept inputs from Excel files, databases, outputs from statistical tools, scanned PDF files, and OCR-processed physical documents. The chatbot will link to both structured and unstructured sources to retrieve pertinent data and initiate automated workflows when necessary. The solution should enable effortless data retrieval and computations fundamental to the GDP process.
- c) All chatbot interactions and data access must be restricted by user role. The system shall record an audit trail of queries and actions for accountability.
- d) The selected bidder shall comply with all organizational IT security standards, including encryption in transit and at rest.
- e) The system shall record an audit trail of queries and actions for accountability. The selected bidder shall comply with all organizational IT security standards, including encryption in transit and at rest.
- f) The chatbot shall provide multilingual NLP support (language identification and translation) when necessary to cater to various languages.
- g) The selected bidder will be accountable for timely delivery of the complete chatbot system along with post-implementation support and maintenance as outlined in the contract.
- h) The system should be created in such a way that it can be retrained on the latest data.
- i) The chatbot shall implement appropriate guardrails and queries only related to official statistics shall be answered.

3.2. Functionalities of Dashboard and Web-based Portal

The data ingestion dashboard/portal would serve as the primary command centre offering (not limited to) processing of statistics, generation of reports & visualizations and display indicators for data validation & flagging of alerts. The dashboard should provide pages for intuitive viewing, querying and visualizations based on the content inserted by NAD officials while working on variety of datasets. The proposed solution should continuously evolve to meet new and changing user information needs, keeping in mind visualization, display, alert and user self-generated reports wherever considered feasible.

3.2.1. Collaboration and Version Control

- a) The platform shall support simultaneous access by multiple users working on the same datasets while maintaining data consistency and preventing conflicts. The system must implement real-time synchronization mechanisms.
- b) Every modification made to datasets within the portal must be tracked and stored with detailed metadata including user identification, timestamp, change description, and affected data elements.
- c) The version control system should maintain complete historical records of all data transformations, calculations, and analytical operations.
- d) Users must be able to compare different versions of datasets, identify specific changes between versions, and restore previous versions when necessary.
- e) The system should provide clear visualization of change histories and support branching capabilities for experimental analyses that may later be merged with main datasets.

3.2.2. Built-in Statistical tools

- a) The portal must incorporate comprehensive statistical analysis capabilities that replicate and enhance the functionality currently provided by SPSS, Excel, MS Access and other statistical software packages.
- b) These tools should include descriptive statistics, inferential testing, regression analysis, time series analysis, and advanced econometric modelling capabilities.
- c) The statistical computing engine should provide both guided workflows and advanced programming interfaces for statisticians.
- d) The system must support standard statistical programming languages and provide extensive libraries of pre-built analytical functions commonly used in national accounts compilation.

3.2.3. Automation Controls

- a) User should be able to manage the interface adapting to changing business requirements without requiring developer intervention.
- b) The system should manage data schedules (e.g. data received monthly, quarterly, annually) and integrate into the portal seamlessly. This will allow manual data entry processes transform into automated workflows that run according to business requirements rather than staff availability.

3.2.4. User Management and Role based access

- a) RBAC should align with NAD's organizational structures and job responsibilities, providing each user with exactly the access they need without overwhelming them with unnecessary options or exposing them to inappropriate system functions.
- b) The system should support hierarchical role structures, unit wise structures and file-based structures that reflect organizational reporting relationships, enabling NAD's

officials to access information about their team's activities while restricting access to sensitive functions or data outside their purview.

- c) Admin roles should be clearly defined along with provision to add/remove existing roles and add new ones.

3.2.5. Object Based Access Control (OBAC)

The suggested solution should incorporate Object-Based Access Control (OBAC) to apply detailed, flexible access control policies at the object level. The system must enable the definition and management of access permissions for particular data entities, reports, APIs, or application components according to user roles, attributes, and object metadata. The following points (not limited to) must be adhered in the proposed system:

- a) Enable administrators to set object-level permissions through a unified interface.
- b) Facilitate flexible policies reliant on user and object characteristics (e.g., division, information classification).
- c) Record all access events for oversight and evaluation.
- d) Ensure that unauthorized individuals are unable to access, alter, or execute prohibited objects.
- e) Incorporate with Identity and Access Management (IAM) allowing detailed control of access to: Single datasets Modules or APIs for applications, Interface components (e.g., buttons, forms), Deployment assets (e.g., environment, build pipelines).

3.2.6. Database Access Management Tool (DAMT)

The Bidder will provide and implement a comprehensive Database Access Management Tool (DAMT) that consolidates control, oversight, and auditing of all database access throughout the NAD's ecosystem. The DAMT should incorporate (not limited to) the following features:

- a) Assistance for access policies based on roles and attributes along with detailed permission management at the schema, table, row, and column levels.
- b) Storage of all database credentials, SSH keys, and certificates in an encrypted form
- c) Record complete SQL queries for all activities conducted by privileged users.
- d) Unchangeable, tamper-proof audit logs for all access requests and activities.
- e) Prebuilt connectors for RDBMS system for integration and interoperability.

3.2.7. Content Management System (CMS)

The portal will be managed and controlled through the 'Application Admin' module and 'Content Management' module of the Portal with an intention of making most of the information available for stakeholder's consumption through the web-based portal. The selected Bidder shall develop a comprehensive, browser-based CMS with information control and display features, enabling any NAD user to access and operate the system seamlessly from any location.

3.2.8. Multilingual Support

The portal should be well equipped to support Hindi and English language. The data ingestion & dissemination both require the system to read the language formats and map the data accordingly.

3.2.9. Advance Search Filters

The portal should support search and filter functionality based on predictive search, keyword-based search and dynamic viewing options for queries.

3.2.10. Security and Authentication

- a) Support single sign-on (IAM) or a robust login system.
- b) Access controls must restrict data visibility by role/unit.
- c) All data in transit and at rest must be encrypted.
- d) Logging should audit who accessed or changed data. The system should guard against common web threats (SQL ingestion, XSS) per ISO/IEC 27001 best practices.
- e) Audit capabilities track all user activities within the system, providing detailed logs of who accessed what information when, and what actions they performed.
- f) The Bidder shall monitor and provide the following security layers:
 - i) Layer 4 - Layer 11 Firewall
 - ii) Intrusion prevention / detection (network and host level)
 - iii) Anti-virus, event logging and correlation
 - iv) Vulnerability protection through implementation of proper patches and rules
 - v) Vulnerability Assessment and Penetration testing before Go-live of any module
 - vi) Database Activity Monitoring
 - vii) Multi-Factor Authentication
 - viii) SSL VPN
 - ix) Anti-DDoS
 - x) Data Leakage Prevention

3.2.11. Guiding Features and Design Principles

The following design features (not limited to) collectively would ensure a comprehensive, user-friendly, and efficient platform for managing innovation challenges and fostering a collaborative environment.

- a) **Low-code / No-code:** Low-Code or No-Code are methods of designing and developing apps using intuitive drag and drop tools that reduce or eliminate the need for traditional developers to write code. The Selected Bidder should take this approach for the proposed work.
- b) **Modular:** The portal should follow micro-service and event-driven architecture practices with each module of the application catering to specific business/ technical use cases.
- c) **High availability:** The portal should be highly available and rapidly scalable based on the traffic. Minimum concurrency checks should be tested for activity-based requirements.
- d) **Distributed:** The components of the portal should be distributed in a multi-server environment, enabling easier maintenance and reliability.
- e) **Policy-driven management:** The application deployment should be governed by well-defined usage and data policies, enabling stronger control on the portal. Policy driven decisions are required to be accounted for scaling and management of infrastructure, archival, maintenance and usage of data storage mechanisms, logs and metrics, security & compliances, accessibility and data retention & archival policy.

3.2.12. Frontend Functionality

The system should have the following features (but not limited):

- a) The portal/dashboard should be easily navigable and searchable.
- b) The portal/dashboard must be accessible to all the units in the NAD division having a clean and systematic layout of options.
- c) Reveal additional content or options only when users interact with specific elements, reducing clutter and cognitive load.

- d) Provide easy-to-use buttons or widgets to share data insights and validations while working on worksheets on the portal/dashboard.
- e) Deploy a clean, modern, and visually appealing design aesthetic that is consistent across all units of NAD, fostering a positive systematic and user-friendly experience.

3.2.13. Backend Functionality

The system should have the following features (but not limited):

- a) NAD's database design, architecture, structuring, and coding focusing on database tables, views, back-end logic, application programming interface (APIs), performance, server APIs, repositories, frameworks ensuring the website performs correctly and along with being scalable.
- b) The solution should have provision for an API Gateway to offer a single-entry point for defined back-end APIs and microservices (which can be both internal and external).
- c) Utilize asynchronous processing techniques to handle long-running tasks without impacting user experience or application responsiveness.
- d) Integrate real-time analytics tools to monitor user activity, platform performance, and identify areas for improvement.
- e) Maintain detailed logs of user activity and system events for security purposes, troubleshooting, and compliance with regulations.
- f) Implement a comprehensive monitoring system that generates alerts for potential issues or performance bottlenecks, allowing for proactive intervention and maintenance.
- g) Notifications should be sent to the concerned stakeholders on scheduled events, reminders and flagging w.r.t sharing of particular dataset or discrepancy encountered in the data.
- h) Establish a comprehensive data backup and recovery strategy to ensure quick restoration of data in case of system outages or data corruption.

3.2.14. Administrative Functions

- a) Global parameter management allows administrators to set system-wide defaults that apply across all data processing activities, while still permitting specific overrides for unique requirements. These tests should simulate actual data retrieval operations to identify potential issues such as authentication failures, network connectivity problems, or changes in data source structure.
- b) The web-based portal must function consistently across all major web browsers including Chrome, Firefox, Safari, and Edge.
- c) The user interface should be responsive and adapt seamlessly to various screen sizes.
- d) The system must provide consistent functionality across different operating systems and should not require users to install additional software or browser plugins.
- e) The system should automatically archive older logs and provide retrieval capabilities when historical analysis is needed.

3.2.15. Training and Capacity Building

- a) The selected Bidder would be responsible for capacity building of all the stakeholders (including Ministry/State Officials/Teams and other stakeholders).
- b) Refresher training during release of each new version/upgrades and dashboard to NAD officials.
- c) The training materials in the form of hard copy as well as soft copy need to be created, generated, maintained, and provided by the selected bidder.

- d) From each unit, 5 to 10 officials shall be trained on how to use the module and shall be involved in testing phase of NAD's Data Ingestion Dashboard.
- e) It will also be required to have historical dataset to ensure enough test cases are run to check integrity of the data ingestion dashboard.
- f) Unit officials shall be testing the data ingestion dashboard before the actual go live-process.
- g) In addition, tutorial and videos should be made for enhanced understanding of the officials.

3.3. Non-Functional Requirements

The system should incorporate a multi-tier security framework that includes (but not limited to) role-based access control, encrypted data transmission, secure audit trails, and limited access to preliminary estimates prior to their official release. It must adhere to the IT security guidelines prescribed by the Government of India, ensuring the use of approved encryption protocols and compliance with the Information Technology Act for managing sensitive government information.

The system should not compromise on any of the parameters listed below:

- a) Security – The data should be stored in a secure environment.
- b) Reliability – The data should not be lost in migration and processing certain outputs.
- c) Accuracy – The data should be accurate and not reflect inconsistencies.
- d) Integrity- The data should not be compromised anywhere throughout its lifecycle.
- e) Flexibility – The infrastructure should be flexible enough to handle growing data requirements along with increasing data complexities.
- f) Resilience – The developed framework should be resilient in nature, with high availability, disaster recovery, and backup/restore capabilities.

3.4. System Architecture and Implementation

- a) The selected bidder will deploy the system on a secure cloud platform (provided by MoSPI). This includes provisioning servers (compute instances or serverless functions), database and object storage.
- b) Data in transit and at rest must be encrypted – for example, use TLS for API calls and AES-256 for storage.
- c) Structured data will reside in a relational or cloud data warehouse (supporting SQL queries), while raw data can be stored in a data lake/bucket.
- d) The Bidder will develop back-end components in any language (REST APIs or batch processors) for data ingestion, validation, and retrieval. The environment will be containerized or virtualized (e.g. Docker, Kubernetes, virtual environments) to manage dependencies and facilitate updates.
- e) Code will be managed in a repository with CI/CD pipelines to enable rapid deployment.
- f) Provision cloud resources (database instances, storage buckets, compute) according to load estimates.
- g) Configure VPC/network, secure firewall rules, and load balancers. Apply encryption settings (SSL certificates, encrypted volumes).
- h) Create databases/data warehouses and configure object storage for raw files. Define backup and replication policies.
- i) Implement programming-based language services for data processing, reading sources, performing transformations, writing to target stores. Include robust data profiling and validation as part of ETL. The ETL Program should have declarative design

- i.e. enable designers to specify what they want accomplished with their data, while the tool generates details of how to perform the task.
- j) Build a module (e.g. a microservice or function) encapsulating the price-estimation algorithm and data checks originally in Excel. Ensure it updates the database or report results automatically.
- k) Establish a Git repo and pipeline to run automated tests and deploy code changes to development/staging/production.

3.5. Technology Stack

The following technology stack shall be implemented for the proposed system under this engagement which would be scalable and flexible w.r.t the changing requirements of the Ministry. All products used to deliver the end-to-end solution shall be deployed in their latest stable versions, with enterprise support included in the financial bid for a 5-year period. An additional 5-year extended support may be opted for by MoSPI.

Functional Area for Tools	Technology Stack (As per the "Policy on adoption of Open-Source Software for Government of India")
CMS	Custom CMS created as per the scope mentioned in this document using latest version of front end/backend technology, enterprise software or open source with enterprise support of content management system (CMS). In case of enterprise version cost of the same to be borne by the Bidder for 5 years from the date of final deployment.
Database	Latest stable version of enterprise edition of any of the databases as per the current Government of India guidelines.
Portal /Front End / UI	Open- source with enterprise support or enterprise software stack as per MeiTY guidelines for development of proposed solution. For ex: Latest stable version of React Js, CSS, Java Script, etc.
Back End	Open- source with enterprise support or enterprise software stack as per MeiTY guidelines for development of Backend. For ex: Latest stable version of Node.Js
Scripting language	Open-source scripting language like Python etc.
Deployment environment on Linux based servers – Bidder to assess the hardware requirements.	• Development – Development environment has to be set up by the selected bidder and bear the costing of the same. This includes all the hardware, software and licensing costs required for the development of the proposed system. • QA/UAT – MoSPI to provide the requisite servers, selected bidder to install, configure and integrate the software packages as required, along with tools and extensions required for successful development of the system. • Production – MoSPI to provide the requisite servers/ VMs. Selected bidder to provide all the software and licensing costs required for the development of the proposed system and integrating the same in the proposed solution for the 5 years. • Disaster recovery along with server replica update – MoSPI to provide the requisite servers / VMs. Selected bidder to install the software packages and licenses as required. The switchover functionality SOP to be established by the selected bidder.
Cloud Integration	The proposed solution must support deployment on cloud infrastructure, with a preference for platforms that offer multi-

Functional Area for Tools	Technology Stack (As per the "Policy on adoption of Open-Source Software for Government of India")
	cloud compatibility. The solution should be deployable on any of the Government of India empanelled cloud service providers (MeiTY-approved), without being tied to a specific bidder or proprietary ecosystem.
Licencing of Enterprise Software, if any used	The licence will be procured by the bidder in the name of the Ministry, any cost arising out of such licences is to be borne by the bidder and included in the financial proposal for the complete duration of the project, i.e. development and maintenance.

3.6. Indicative Modules

The Bidder would be required (but not limited to) to integrate the following modules into the new system for seamless functioning.

S.No.	Work Modules	Definition
1	Database Module	Manages the design, storage, retrieval, and manipulation of structured data. Includes schema design, indexing, backup/restore mechanisms, and ensures data integrity, consistency, availability etc.
2	User Management Module (IAM)	Handle's identity and access management, including user authentication, role-based access control (RBAC), authorization workflows, password management, session control, creation of new user manual and audit logging to secure and manage users efficiently.
3	Data Entry Module	Provides interfaces for manual or assisted data input through forms. Includes field validations, input constraints, auto-fill features, and supports bulk upload functionalities through CSV/Excel/Web Forms/API/PDF integrations.
4	Data Processing Module	Performs backend operations to validate, transform, enrich, and standardize raw input data. Supports real-time and batch processing logic, rule engine integration, and data cleansing mechanisms.
5	Report Generation Module	Facilitates dynamic and static report creation with filter options, grouping, and export capabilities (PDF, Excel, CSV). Supports scheduled report generation and delivery through email or portal download.
6	Dashboard Module	Offers a consolidated view of key indicators and operational metrics using cards, widgets, and summaries. Includes customizable layout options, role-based views, and drill-down capabilities.
8	Analytics Module	Provides advanced insights using statistical models, machine learning algorithms, and trend analysis. Supports decision-making through predictive analytics, anomaly detection, and performance benchmarking.
9	Migration Module	Facilitates smooth transfer of legacy or external system data into the new application framework. Supports data mapping, validation, transformation, and integrity checks to ensure accurate and complete migration.

S.No.	Work Modules	Definition
10	Notification Module	Manages rule-based and event-triggered communication such as SMS, email, and in-app alerts. Integrates with government-compliant gateways and maintains audit logs for message delivery and status tracking.
11	CMS Module	Content Management System for managing dynamic content (text, images, FAQs, banners) on the application without developer intervention. Provides role-based editing, version control, and publishing workflows.
12	Deployment Module	Supports packaging and release management of application builds across development, staging, and production environments. Enables CI/CD pipelines, rollback capabilities, and deployment logging.
13	Security Module	Enforces application-level security including data encryption, input sanitization, firewall configuration, vulnerability assessment, and compliance with OWASP and CERT-IN guidelines. Ensures end-to-end secure transactions.
14	Alarm Module	The system shall raise alarm to notify any issues that can hampered the functionality of the overall solution. Application Monitoring dashboard shall also be created that shall show the health of the overall system.
15	Geographical Redundant Module (Geo Red Module)	The provisioning of Geo Redundancy and highly availability deployment of the solution shall be supported. This is applicable for both application, front end, backend and database.
16	AI/ML Module	The Artificial Intelligence module explores the capabilities of AI—where machines exhibit intelligence by perceiving their environment and making decisions aimed at maximizing the chances of achieving defined objectives.

3.7. Testing and Quality Assurance

The Bidder will execute comprehensive testing (not limited to) on the following:

- Unit Testing:** Develop and run unit tests for all code modules (Programming scripts, APIs, portal back-end).
- Integration Testing:** Test end-to-end data flows (from source ingestion through to portal output).
- Data Accuracy Testing:** Compare migrated data samples against source to verify completeness and correctness.
- Performance Testing:** Conduct load and stress tests on the data platform and web portal (e.g. simulate concurrent users, large data ingestion) to ensure the solution meets scalability and responsiveness targets.
- Security Testing:** Perform vulnerability scans and penetration tests on the portal and infrastructure; fix any issues.
- User Acceptance Testing (UAT):** Facilitate end-user testing with representatives from each unit; incorporate feedback and obtain formal acceptance.
- Regression Testing:** After bug fixes or updates, re-run tests to ensure no new issues were introduced.

*All the test reports for each of the testing shall be created by Bidder and vetted by NAD for approval.

3.8. Key Considerations

- a) The system will be designed to be scalable, easily extensible, and easy to integrate with internal and external systems.
- b) The system should be flexible enough to cater to changing business, industry, and compliance requirements.
- c) Design & develop the robust system that is scalable for the coming 10 years and with provisions for any future enhancements.
- d) The selected bidder would be responsible providing the database, OS, software requirements such as BI tools for a period of 5 years from the start of contract.
- e) The selected Bidder shall deploy a SPOC at NAD for this project, who would coordinate with NAD regarding all activities including the phases defined in the RFP and ensure milestone-based delivery as per timelines defined for the project.
- f) It may be noted that the selected Bidder will deploy highly skilled resources to manage and maintain lifecycle activities of the NAD's infrastructure and/or if any as per the requirements and at the discretion of NAD.
- g) Unit wise requirement gathering documents will need to be prepared for approval and going ahead with designing the application architecture.
- h) The Bidder will follow the timings and take instructions and guidance from the NAD to perform the activities required for successful completion of the project.
- i) Consultation with the Stakeholders (including NAD teams) may be required for improvements on forms, activities, modules, designs, workflows, etc. based on their suggestions/inputs.
- j) The functionalities outlined by NAD are indicative and based on current business processes, which may evolve by the time of Work Order issuance or during project execution. Any such changes, identified during the Bidder's detailed Functional and System Requirement study, shall be included within the implementation scope without additional financial impact. The selected Bidder may also incorporate necessary additions or modules to meet these requirements.
- k) NAD may agree to modify the requirement mentioned in the FRS document considering suggestions made by the Bidder. However, NAD completely reserves the right to agree or not to agree to any changes suggested by bidder.
- l) The implementation methodology and approach have to be based on the global best practices in order to meet the defined Service Levels during the operation.
- m) The Bidder shall be responsible for designing and implementing an escalation management framework. For this purpose, NAD shall provide and cooperate with the Bidder for access to resources, materials, personnel, information, and consents that Bidder may require in order to perform the escalation management. Bidder shall not reduce the level of maintenance support services provided during the operation of the escalation management matrix without prior written approval from NAD.

3.9. Expected Outcomes

- a) Availability of a centralized and structured database that provides seamless access to data management practices and enhancing coordination among functional units at NAD.
- b) Deployment of an intuitive, secure, and user-friendly web portal supporting role-based access controls for efficient management of data ingestion, validation, processing and dissemination of workflows in a controlled environment.
- c) Implementation of configurable, role-based dashboards that enable users to independently generate reports and visualize data insights through an intuitive interface, without requiring technical expertise.

- d) Automated toolkits for improved data accuracy and consistency through validation rules and embedded checks that replicate the existing analytical logic currently maintained through manual toolkits (Excel/MS Access etc.).

3.10. Documentation

- a) The selected Bidder will be responsible for developing Standard Operating Procedures (SOPs) aimed at enhancing ongoing business processes and ensuring their standardization across the organization. This will involve a thorough analysis of existing workflows, identification of inefficiencies or gaps, and consultation with relevant stakeholders to understand functional and operational requirements. The SOPs will be designed to streamline activities, reduce redundancies, and promote consistency in execution, thereby improving overall efficiency and service delivery. Additionally, the SOPs will serve as a reference framework to guide employees in the consistent application of best practices, support compliance with regulatory or organizational standards, and facilitate smooth onboarding and training.
- b) The Bidder will also ensure that the SOPs are documented in a clear, accessible, and update table format to accommodate future process improvements or policy changes throughout the project life cycle.
- c) Document shall be created for (but not limited to) FRS, SRS, Test cases, Performance test cases, Test Reports, O&M Guide, System Administration Guide, User Guide, Tutorials, Videos, FAQs, SOPs etc.

3.11. Operations and Maintenance

After go-live, the selected bidder will provide support on operations and maintenance. This includes (but not limited to) continuous monitoring of the system for any issues, and promptly troubleshooting bugs or performance problems. The selected bidder would address all the errors/bugs/gaps in the functionalities of the solution (visà-vis the SRS and design documents signed off) at no additional cost during the O&M phase. The selected bidder will apply software updates and patches, ensure backups are taken regularly, and recover data as needed. Any version upgrades of the software/tool/application will be done by the selected Bidder after seeking prior approval from NAD and submitting the impact assessment of an upgrade as such. The selected Bidder must ensure to Manage Zero Day Vulnerability Attacks. They will handle helpdesk support for user queries and provide minor enhancements. Maintenance also covers optimizing performance (e.g. indexing databases) and evolving the system: adding new reports or data sources as requirements change. Finally, the Bidder will hand over complete documentation and train the NAD's IT team to manage the system independently.

- a) **System for SLA Monitoring & Alerts:** Implement system-health dashboards and alerts (e.g. cloud monitoring, log alerts) and respond to any outages or exceptions.
- b) **Incident Management:** Try and resolve incidents according to SLA; document solutions for common issues.
- c) **Regular Maintenance:** Schedule periodic jobs (backups, archival, re-indexing) and keep software components updated.
- d) **Performance Tuning:** Analyse logs/metrics and tune the database and application for speed and reliability.
- e) **Support & Training:** Provide a support helpline or ticketing, and update user documentation as the system evolves.

The selected Bidder shall ensure that the system addresses all the SLA measurement requirements and calculation of applicable penalties as indicated in this RFP. The Bidder

shall be responsible for maintaining all the master data for the portal and dashboards for each unit and ensure readiness and system uptime at the highest levels.

**Also, the Bidder will provide full support and assistance in case of any requirement related to development of any module is asked by NAD. This is subject to any modification or changes with the developed module by the Bidder that is hampering the output of NAD.*

3.12. Compliances and Guidelines

- a) **Accessibility (Latest WCAG):** The portal must meet WCAG Level AA accessibility standards. India's GIGW explicitly adopts the W3C's WCAG guidelines, so all content (text, images, forms) must be perceivable and operable for users with disabilities. For example, all images need alt-text and all interactive elements must be keyboard-accessible.
- b) **GIGW Guidelines:** The system must conform to the Guidelines for Indian Government Websites (GIGW 3.0). This includes quality, usability, and security checkpoints. NIC's GIGW mandates consistent UI conventions, mobile compatibility, and content standards for government sites. The Bidder should arrange for official GIGW certification or audit by STQC after deployment.
- c) **The Digital Brand Identity Manual:** DBIM Toolkit must be strictly adhered to, ensuring consistent application of logos, colour schemes, typography, and visual elements across all digital platforms and communication materials etc. For details kindly refer DBIM Manual.
- d) **Information Security (ISO 27001):** The development and deployment should follow ISO/IEC 27001 information security management practices.
- e) **IT Act and Data Privacy:** The system must comply with the Indian IT Act, 2000 (as amended) concerning electronic records, digital signatures, and privacy rules. Any personal sensitive data must be handled per the Act and the Digital Personal Data Protection Act & latest DPDP Rules.
- f) **Data Sharing Policy:** Follow MoSPI/NDSAP rules on open data: share any non-confidential data in machine-readable formats, and properly license public data. (MoSPI's NAD explicitly categorizes data under NDSAP 2012 rules.) (if applicable).

3.13. Security Audit

The security audit process involves deployment of the application in a staging environment followed by a tool-based audit & manual audit in multiple iterations till all the vulnerabilities are removed. During the iterations, the developers will be required to address audit issues and rectify source code. The activity should be performed by CERT-IN empanelled application security auditors and submit Security Audit Certificate at the successful conclusion of audit after all vulnerabilities are fixed.

The selected Bidder is required to disclose the name of the finalized Auditor before on-boarding. The selected Bidder needs to ensure that the Portal follows the Security Policy and Guidelines released by CERT-IN, MeITY from time to time. The cost of audit shall be borne by the selected Bidder also, the cost of rectification and fixes of non-compliances shall be borne by the selected Bidder. The audit shall be performed at least on the below mentioned aspects.

- a. Accessibility Testing
- b. Performance Testing
- c. Application Security Audit
- d. Penetration Testing
- e. Vulnerability Testing

Note: This is to be noted that yearly comprehensive security audit of the application as per CERT-IN advisories/guidelines will be undertaken through MeITY/CERT-IN empanelled agencies, all the finding, necessary compliances and gaps found in the audit will be addressed by the selected Bidder as per the agreed timelines and without any additional cost to NAD. In addition, a safe to host certificate would have to be attained by the selected bidder and subsequent audit of the application in case of any major change or annually whichever is earlier.

3.14. STQC Certification

To ensure compliance with the "Guidelines for Indian Government Websites" (GIGW 3.0) will also require STQC certification. The selected bidder shall be responsible for obtaining the certification from STQC prior to Go-Live.

4. Pre-Qualification Criteria

The Bid will be evaluated on each criterion mentioned in this document and satisfy itself beyond doubt on the Bidder's ability/ position to meet the criteria. Those Bidders who qualify on all the criteria as brought out in the table below will only be considered for technical evaluation. Those Bidders who do not qualify for pre-qualification will not be considered for any further processing. Bidders who are meeting all the eligibility criteria respond to this RFP. The bidder shall submit self-assessed compliance to Pre-Qualification criteria checklist prescribed in [Appendix - 2](#). Bids not conforming to any of the minimum eligibility criteria shall be out rightly rejected. MoSPI may ask bidder(s) for additional information to verify claims made in their eligibility document, at any point of time before opening of the technical bid. Evaluation of eligibility criteria will be as per the information/ response provided by the bidder and the supporting documents as mentioned in the RFP:

S.No	Parameter	Pre-qualification criteria description	Supporting document
1.	Cover Letter	Cover letter of the bid with valid authorization details of the person(s) signing the bid document as on date of bid submission	a) Cover letter signed by an authorized signatory of the bidder as per Form 1 in Appendix-3 . b) Power of Attorney (PoA) on Non-Judicial stamp paper of Min Value of Rs. 100/- in the name of authorized signatory as per Form 2 Appendix-3 . OR c) Certified copy of Board Resolution (BR)
2.	Legal Entity	a) The bidder must be any private/public limited company or limited liability partnership or partnership firm or autonomous body or organization or society or	a) Certificate of Incorporation/ registration (Form 3 of Appendix 3)

S.No	Parameter	Pre-qualification criteria description	Supporting document
		any other institution registered/incorporated under relevant statute. b) The bidder should be in existence for minimum 5 years, as on due date of RFP. c) The bidder(s) must have Income Tax Registration (PAN) and GST Registration. d) Consortium/ Joint Venture/ Individuals are not allowed.	b) Letter from Company Secretary/ Statutory Auditor for operating business for last 5 years as on date of bid submission. c) Copy of PAN Card & GST registration certificate
3.	Turnover	The bidder should have an average annual turnover of at least INR 100 Crores in the last 3 audited financial years. (FY 2021-22, 2022-23 & 2023-24). The turnover should be from IT Solution/software application development & implementation. a) NOTE: Turnover of only the bidding entity will be considered. The Turnover of any parent, subsidiary, associated or other related entity will not be considered.	a) A certificate duly certified by the Statutory Auditor of the bidder mentioning the average annual audited turnover from IT Solution/ software application development & implementation in the last 3 audited financial years (FY 2021-22, 2022-23 & 2023-24). (Use Form 4 in Appendix 3) b) Copy of audited Balance Sheets and Profit & Loss Statements for the last 3 financial years (FY 2021-22, 2022-23 & 2023-24) duly certified by statutory auditor
4.	Project Experience	The bidder should have experience of successfully Go-Live/ executed/ Completed/ on-going similar projects related to development, implementation of software solution/ process automation/ Data Pipeline and database management/ Data warehouse/ Data Lake/Data Lakehouse for Central Ministries / Departments /State Governments / UT Administrations/ Public Sector Enterprises/ Undertakings/ Banks/ Government Autonomous bodies.	a) Details of the assignments as per Form 5 of Appendix 3. b) Copy of work order/ Contract Agreement c) Completion/performance Certificate from client containing project value completed/executed by the bidder. d) In case of non-availability of completion/performance certificate from client, the certificate regarding proof of timely /regular payments received against

S.No	Parameter	Pre-qualification criteria description	Supporting document
		(Projects completed/ongoing in the last 5 audited financial years starting from FY 2019-20 onwards will only be considered). At least two (02) similar projects each of INR 10 crores or more.	the rendered services duly certified by CA and authorized signatory. e) For ongoing projects, CA certificate will be considered certifying that 60% payment has been received by the bidder for that project and duly certified by authorized signatory.
5.	Technical Manpower Strength	The bidder should have in its rolls, a staff of at least 100 technically qualified (B.E./B.Tech./ M.Tech.(CS/IT)/ MCA/ MBA (IT)/ M.Sc. (CS/IT)) personnel with relevant experienced in IT solutions, Development, Implementation, Maintenance & Management skills as well as physical/cloud infrastructure management & maintenance	a) An undertaking / self-declaration as per the <u>Form 9 of Appendix 3 of this RFP</u>, duly signed (with Organization seal), by the HR, Head of the Organization b) Copy of EPF Combined challan for the month of June 25, or latest.
6.	Proposed Key Resources	The Bidder must have at least 2 proposed key personnel i.e., Program Manager and Solution Architect and should have been with the bidder for at least 3 months (from the last day of submission of bid). The details of minimum educational qualifications and experience are as under: a) Program Manager: - o B.E./B.Tech. (CS/IT) and M.Tech.(CS/IT)/ MCA/MBA (IT)/ M.Sc. (CS/IT) with minimum 15 Years of Exp. in Software Technology Implementation. - o Managed at least 5 projects with the Central or State Govt., PSUs. b) Solution Architect:	CVs of key personnel with relevant educational qualification and details of the required resource (Qualification & Experience) should be certified through an undertaking by the bidder to MoSPI at the time of proposal submission certifying the deployment and availability of the proposed resources. Copies of relevant education Qualification/certifications

S.No	Parameter	Pre-qualification criteria description	Supporting document
		B.E./ B.Tech. (CS/IT)/ MCA/ M.Tech. (Cs/IT)/ M.Sc. (CS/IT) with minimum 10 years of experience in Data Science/ relevant field.	
7.	Certifications	The Bidder must have CMMI L5 certification. (Development/Services)	Copy of valid certificate duly authenticated by the authorized signatory confirming authenticity of the submitted document. Additionally, a link to appraisal result (Published Appraisal Results or PARS) on the CMMI Institute's official site to be provided. The certification must be valid as on the last date of Bid submission.
8.	Non-Blacklisting	The Bidder must not have been blacklisted (as on bid submission date) by any Central Ministries / Departments/State Govts / UT Administrations / PSUs / PSBs and govt autonomous bodies. The Bidder should not have been debarred (as on bid submission date) from dealing with any company/public department in the last three years as on due date of RFP.	Certificate duly signed by authorized signatory of the bidder on a non-judicial stamp paper (100 Rupees) and duly notarised by Notary (Form 7 in Appendix 3)
9.	Pre-contract integrity pact/ NDA	Bidder has to submit non-disclosure agreement in the technical bid duly signed by Authorised signatory	Non-disclosure agreement in the format prescribed in (Form 8 in Appendix 3)

Additional Notes:

Note 1: Projects limited to hardware supply, AMC, or software product resale will not be considered for experience or turnover.

Note 2: Renewal or extension of ongoing/completed projects will be considered as a single project.

Note 3: Only those bidders fulfilling the above Pre-Qualification/Eligibility Criteria will be considered for further technical evaluation.

5. Technical Qualification

The bidder shall submit self-assessed compliance to Technical Qualification criteria checklist prescribed in [Appendix -2](#).

S.No	Criteria	Parameter	Supporting Documents	Max Marks
1	The bidder should have on-roll, a staff of at least 100 technically qualified (B.E./B.Tech., M.Tech. (CS/IT), MCA, MBA (IT), M.Sc. (CS/IT), B.Sc. (CS/IT), or BCA) from recognized institutions) personnel with relevant experienced in IT solutions, Development, Implementation, Maintenance & Management skills as well as physical/cloud infrastructure management & maintenance.	No of technical resources a) Equal to 100: 05 marks b) More than 100 less than 150: 07 marks c) More than 150: 10 marks	a) An undertaking / self-declaration as per the Form 9 of Appendix 3 of this RFP, duly signed (with Organization seal), by the HR, Head of the Organization b) Copy of EPF Combined challan for the month of June 25, or latest.	10
2	The bidder should have an average annual turnover of at least INR 100 Crores in the last 3 audited financial years. (FY 2021-22, 2022-23 & 2023-24). The turnover should be from IT Solution/ software application development & implementation.	a) More than or equal to 100 Crores and less than 250 Crores: 04 marks b) More than equal to 250 Crores and less than 500 Crores: 07 marks c) More than or equal to 500 Crores: 10 marks	a) A certificate duly certified by the Statutory Auditor of the bidder mentioning the average annual audited turnover from IT Solution/ software application development & implementation in the last 3 audited financial years (FY 2021-22, 2022-23 & 2023-24). (Use Form 4 in Appendix 3) b) Copy of audited Balance Sheets and Profit & Loss Statements for the last 3 financial years (FY 2021-22, 2022-23 & 2023-	10

S.No	Criteria	Parameter	Supporting Documents	Max Marks
			24) duly certified by statutory auditor	
3	The bidder should have experience of successfully Go-Live/ executed/ Completed/ on-going similar projects related to development, implementation of software solution/ process automation/ Data Pipeline and database management/ Data warehouse/ Data Lake/Data Lakehouse for Central Ministries / Departments /State Governments / UT Administrations/ Public Sector Enterprises/ Undertakings/ Banks/ Government Autonomous bodies. (Projects completed/ ongoing in the last 5 audited financial years starting from FY 2019-20 onwards will only be considered).	a) Two (02) projects, each of value 10 crores or more = 15 marks b) For each additional similar project of value 10 crore or more: 7.5 marks up-to maximum 30 marks. Additional 10 marks if: a) development of projects involving large scale Data management through Data Lake/Data Warehouse – 05 marks b) development of projects involving large scale Data management through Data Lakehouse- 05 marks	a) Details of the assignments as per Form 5 of Appendix 3 b) Copy of work order/ Contract Agreement c) Completion/performance Certificate from client containing project value completed/executed by the bidder. d) In case of non-availability of completion/performance certificate from client, the certificate regarding proof of timely /regular payments received against the rendered services duly certified by CA and authorized signatory. e) For ongoing projects, CA certificate will be considered certifying that 60% payment has been received by the bidder for that project and duly certified by authorized signatory.	40
4	Proposed Key resources			10
4 (a)	Program Manager (Educational Qualifications & Work Experience)	B.E./B.Tech. (CS/IT) and M.Tech.(CS/IT)/ MCA/ MBA (IT)/ M.Sc. (CS/IT) with minimum 15 Years of Exp. in Software	CV of the professional should be attached as per the format given in RFP (Use Form 6 in Appendix-3)	5

S.No	Criteria	Parameter	Supporting Documents	Max Marks
		Technology Implementation. – 03 marks Additional Marks For additional 1 year of exp above 15 years – 01 mark Any technical certification – 01 mark	Copies of relevant education Qualification/ certifications	
4 (b)	Solution Architect (Educational Qualifications & Work Experience)	B.E./ B.Tech. (CS/IT)/ M.Tech. (Cs/IT)/ MCA/ M.Sc. (CS/IT) with minimum 10 years of experience in Data Science/ relevant field. – 03 marks Additional Marks For additional 1 year of exp above 15 years – 01 mark Any technical certification – 01 mark	CV of the professional should be attached as per the format given in RFP (Use Form 6 in Appendix-3) Copies of relevant education Qualification/ certifications	5
5	Assessment of the capacity. The proposed plan/model of the bidder for undertaking the work with due justification of resource deployment and action plan for completion of the project by target dates. (Based on comprehensive information given in the Scope and other detailed action plan)	a) Understanding of the project requirements – 05 marks b) Solution Architecture of the Proposed System – 05 marks c) Approach and Methodology	Overall understanding of the project (Technical Presentation and Personal Interview)	30

S.No	Criteria	Parameter	Supporting Documents	Max Marks
		for Proposed Implementation, work Plan, Data Migration plan – 05 marks d) Quality of Experience in prior projects similar in nature – 05 marks e) Personal Interview of the 2 Key Resources: 10 Marks		

NOTE: Bidder has to submit CVs of candidate for each proposed profile/position in the technical bid as per the format given in this RFP.

6. Evaluation Criteria

6.1. Technical Bid Evaluation

- a) Depending on the evaluation criteria mentioned, each Technical Bid will be assigned a technical score out of a maximum of 100 Marks.
- b) Only the bidders who score a technical score of at least 70 marks out of 100 marks in the technical evaluation will qualify for the financial bid evaluation.
- c) The score of the bidder who secures the highest Technical Score will be taken as 100 and the Scores of other bidders will be normalized using the following formula:

$$T = 100 * (T_0 / T_1)$$

T₀: score obtained by the bidder.

T₁: maximum score in technical evaluation obtained by any bidder.

6.2. Financial Bid Evaluation

The financial bids of only those bidders will be opened who qualify the technical evaluation stage and will be considered for financial bid opening.

Each bidder will be given a Normalized Financial Score (F) as per below mentioned formula:

$$F = 100 \times (F_m / F_b)$$

F_m is lowest financial quote among all technically qualified bids.

F_b is financial quote by the bidder being evaluated.

6.3. Evaluation Process

- a) MoSPI will constitute a Tender Evaluation Committee (TEC) to evaluate the responses of the Bidders. The Committee shall evaluate the responses to the RFP and all supporting documents / documentary evidence. Inability to submit requisite supporting documents / documentary evidence, may lead to rejection.
- b) Technical bids thus opened will be evaluated by MoSPI subsequently.
- c) In the event of the specified date of bid opening being declared a holiday for MoSPI, the bids shall be opened at the appointed time and location on the next working day.
- d) The decision of the Committee on the evaluation of responses to the RFP shall be final.
- e) MoSPI may seek clarifications from the Bidder on the Technical & Financial Proposal.

During evaluation of bids, MoSPI may, at its discretion, ask the bidder for a clarification of its bid. The request for clarification and the response shall be made in writing through GeM. If the response to the clarification is not received before the expiration of the deadline prescribed in the request, MoSPI reserves the right to evaluate bids based on available documents which may also lead to rejection of the bid.

6.4. Negotiation

The bid of the highest acceptable responsive bidder (H1) should normally be accepted. However, if the price offered by that bidder is not acceptable, negotiation may be held only with H1 bidder.

6.5. Method of Selection

- a) For final selection of the bidder, the technical qualified bid will be given a weightage of **70%** based on criteria for evaluation. The price bids of only those bidders who qualify technically will be opened.
- b) The financial bid shall be allocated a weightage of **30%**. For working out the combined score, following formula will be used as per GeM:

$$\text{Total Score (H)} = (0.7 \times T) + (0.3 \times F)$$

Here,

T stands for technical score and

F stands for Financial Score

The bids will be ranked in terms of total Score. The bid with the highest total Score will be considered for the award of the contract.

Note:

- a) If a bidder quotes NIL charges/consideration, the bid shall be treated as non-responsive and will not be considered.
- b) The bid price will include all taxes and levies and shall be in Indian Rupees as per GeM.
- c) Any conditional bid would be rejected.
- d) MoSPI will determine whether the financial bids are complete and unconditional.

6.6. Award of Contract

The bid will be awarded as per the Bid Evaluation methodology. MoSPI reserves the right to accept or reject any bid and to annul the bidding process and reject all bids at any time without incurring any liability to the affected bidder or bidders, with or without assigning any reason.

Notification to Bidder: Before the expiry of the period of validity of the bid, MoSPI shall notify the successful bidder in writing by registered letter or by e-mail or by fax, that its bid has been accepted. The bidder shall acknowledge in writing the receipt of the notification of award to MoSPI. The date and time for the same shall be notified to the bidder in writing by MoSPI.

Signing/Issue of Contract/Work order: The contract/work order shall be signed on all the pages by the person(s) duly authorized to bind the successful bidder to the contract/work order. The stamp of the organization shall also be affixed on each page of the contract/ work order. MoSPI may discuss certain terms with the successful bidder before signing/ issuing the contract/ work order.

Expenses for the Contract/ Work order: The incidental expenses of execution of agreement / contract/ work order shall be borne by the selected bidder.

Failure to Abide by the Contract/ Work order: The conditions stipulated in the contract/ work order shall be strictly adhered to and violation of any of these conditions will entail termination of the contract/ work order without prejudice to the rights of MoSPI to impose penalties as specified in the bidding document and the contract/ work order

6.7. Termination of Contract

- a) MoSPI reserves the right to suspend any of the services and/or terminate the agreement/contract in one or more of the following circumstances by giving 30 days' notice in writing:
 - i) In case, the overall penalty/deduction for the selected bidder exceeds 10% of the contract value.
 - ii) The selected bidder has failed to commence the Services as per the timelines of the RFP.

- iii) If staffing personnel and/or services as per the scope of work under the contract with MoSPI is not found un-acceptable by MoSPI.
- b) Termination for Insolvency, Dissolution etc.:

MoSPI may at any time terminate the contract by giving written notice to the selected bidder without compensation to the selected bidder, if the selected bidder becomes bankrupt or otherwise insolvent or in case of dissolution of firm or winding up of company, provided that such termination will not prejudice or effect any right of action or remedy which has accrued thereafter to MoSPI.
- c) Termination for Default:

MoSPI may without prejudice to any other remedy for breach of contract, (including forfeiture of security deposit, Performance Bank Guarantee) by written notice of default sent to the selected bidder, terminate the contract in whole or in part after sending a notice to the bidder in this regard.

 - i) If the bidder fails to accept the Work Order(s).
 - ii) If the bidder fails to deliver services within the time-period specified in the Work Orders or during any extension thereof granted by MoSPI.
 - iii) If the bidder fails to meet any other terms and conditions under the contract.
- d) Termination for Convenience:

MoSPI may by written notice, sent to the selected bidder, terminate the work order and/or the Contract, in whole or in part at any time of its convenience. The notice of termination will specify that termination is for MoSPI's convenience, the extent to which performance of work under the work-order and/or the contract is terminated and the date upon which such termination becomes effective. MoSPI reserves the right to cancel the remaining part and pay to the selected bidder an agreed amount for partially completed Services.
- e) The selected bidder has neglected or failed to observe and perform all or any of the term's acts, matters or things under this Contract to be observed and performed by it. The selected bidder has acted in any manner to the detrimental interest, reputation, dignity.
- f) In the event the selected bidder exits the project before completion or fails to deliver the agreed scope of work as per the contract without valid justification accepted by the client.
 - i) Forfeit the Performance Bank Guarantee (PBG) or any other security deposit submitted by the vendor
 - ii) Initiate legal proceedings or arbitration as per the dispute resolution clause.
 - iii) The client also reserves the right to blacklist the vendor from participating in future bids for a period deemed appropriate.

6.8. Tentative Manpower Details

The project is Deliverable/Milestone based and the table attached herewith shows the indicative manpower required to be deployed on the project. The resources should comply with the roles and responsibilities as mentioned below. The Key Resources should be deployed on the project (onsite) (Program Manager and Solution Architect) throughout the development phase. The count of resources shall be in accordance with number of tasks being undertaken in parallel and as per the requirement in the respective phase of the project.

During the Development/O&M phase the selected bidder needs to ensure these profiles but not limited to:

Program Manager, Business Analyst, Solution Architect, Frontend Developer, Backend Developer database Administrator, DevOps Engineer, System Administrator, Tester, UI/UX Designer, Database Engineer, AI/ML Expert

Operation and Maintenance Phase: Frontend Developer, Backend Developer, Database Administrator, System Administrator

Note:

- 1) As and when required by the Ministry, all resources should be present onsite.
- 2) In Operation & Maintenance phase 6 resources should be present onsite at MoSPI.

Indicative Role and Responsibilities:

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
1.	Program Manager	• B.E./B.Tech (CS/IT) with MTech/MBA(IT) or equivalent with 15+ Years of Exp. in Software Technology Implementation. • Managed at least 5 projects with the Central or State Govt., PSUs etc.	a) Managing projects related to Web portal. b) Ensure the development and implementation of all web portals and IT-related activities. c) Design and development, enhancements of applications related to schemes, and work assigned by the competent authority. d) Define Project objectives and success criteria. e) Develop program roadmap and establish project governance. f) Identify and manage risks and dependencies. g) Manage project timelines, stakeholder communications, resource allocation based on work schedules & project timelines.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			h) Facilitate collaboration and communications along with communicating program status and updates.
2.	Solution Architect	• B. Tech/MCA/ B.E./ M.Sc. (in Computer Science/Information Technology/Data Science/related field) with 10+ years of experience in relevant field.	a) At least 8 years of Hands-on Development Experience preferable in Node.js and React.js. b) Relevant experience with IT architecture, infrastructure, and cloud Management. c) Experience with SDLC and software architecture design. d) Experience in implementing DevOps practices. e) Experience in Structured & Unstructured DB, Database Modelling and data security. f) Experience in BCP/DR Setup. g) Responsible for all inter division related activities but not limited to – Technical Analysis of the requirements of Ministry to determine their technology needs. h) Preparing Technical Documents/Low Level Design /High Level Design Document, system requirement specifications (SRS) and Non-Functional requirement specifications (including, Security and Performance criteria). Provide Technical inputs as and when required. i) Define suitable technology stack in line with MeitY Guidelines. j) Experience with Troubleshooting and Preparation of Root Cause Analysis report along with suggested solutions. k) Experience with Code Management Repository (e.g. Git Hub, Gerrit etc.) l) Experience with Python or any other object-oriented language development, Performance Testing and Automated Testing through Scripts. m) Experience with Deployment of Modules on Cloud Servers.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			n) Experience of working on containerized applications(e.g. Docker, Kubernetes, virtual environments etc.). o) Experience in designing of RESTFul/SOAP API's.
3	Business Analyst	• B. Tech/ MCA/ B.E/ M.Sc. (in Computer Science/Information Technology/Statistical field) & MBA/Ph.D./PGDM/PGDBM or equivalent with 5+ years of experience in relevant field. • PGDM / PGDBM of 2 years duration will be considered.	a) Responsible for all inter division related activities but not limited to – Analysing the requirements of Ministry/Divisions to determine their technology needs. b) Hands on experience w.r.t. working on Statistical data. c) Preparing User Requirement Documents, functional requirement specifications (FRS) and Non-Functional requirement specifications (including, Security and Performance requirements). d) Developing Government procurement deliverables (e.g. RFP, DPR, etc.) and vendor contracts, end to end support in the procurement process. e) Define functional use cases for testing of the developed product. f) To track and monitor the progress of development cycle and suggest corrective actions, if any. g) Preparation of Meta Data for each data product/dataset. h) Prepare Test cases for User Acceptance Testing and Publish Test Reports & Participate in Test Automation using Industry Standard Tools. i) Provide Inputs to UI/UX Designer according to Requirements for Business Workflow and get it vetted from stakeholders.
4	Frontend Developer	• B.Tech. / B.E. / MCA / M.Sc. (Degree in IT OR CS) OR master's in technology. • Minimum 5 Years experience in Frontend Development.	a) Hands on Development Experience in React.js, HTML, CSS and Frontend Technologies, Integration with APIs, Testing. b) Experience with Code Management Repository. c) Experience in creating SRS or Low-Level Design Document.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			d) Experience in UI/UX Design. e) Troubleshooting for Issues and Root Cause Analysis.
5	Backend Developer,	• B. Tech/MCA/B.E./M. Sc. (in Computer Science /Information Technology/Data Science/related field) with 5+ years of experience in relevant field.	a) Develop, maintain, and optimize server-side logic, databases, and APIs to ensure seamless data exchange between the server and users. b) Design and implement scalable, secure, and high-performance backend architecture. c) Write clean, reusable, and efficient code using backend technologies like Node.js, Python, Java, .NET, etc. d) Create and manage database systems (SQL/NoSQL), perform schema design, and ensure data integrity and security. e) Build and maintain RESTful or GraphQL APIs for integration with front-end applications and third-party services. f) Implement authentication, authorization, and data protection mechanisms (e.g., JWT, OAuth). g) Ensure proper integration of front-end elements built by UI developers with server-side logic. h) Monitor application performance and troubleshoot issues related to latency, memory leaks, and server errors. i) Collaborate with front-end developers, DevOps engineers, QA testers, and product teams for smooth project delivery. j) Conduct code reviews and provide constructive feedback to peers. k) Maintain documentation of system processes, APIs, and infrastructure for future reference. l) Implement caching, logging, and queuing mechanisms (e.g., Redis, RabbitMQ) for performance optimization.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			m) Ensure compliance with security, privacy, and regulatory requirements. n) Participate in the development lifecycle, including planning, development, deployment, and maintenance. o) Stay updated with emerging technologies and best practices in backend development.
6	Database Administrator	•B. Tech/MCA/ B.E./ M. Sc. (in Computer Science/Information Technology/ related field) with 5+ years of experience in the relevant field.	a) Design, implement, and maintain the overall database architecture to support the web portal's functional and performance requirements. b) Ensure optimal database performance through tuning, indexing, and query optimization. c) Manage database security by implementing appropriate access controls, user roles, and encryption mechanisms. d) Create and maintain data backup, restoration, and disaster recovery procedures to ensure data integrity and availability. e) Monitor database health, capacity, and performance metrics regularly to ensure high uptime and availability. f) Collaborate with application developers to define data models, establish relationships, and optimize data flow. g) Perform regular updates, patches, and migrations of databases as required. h) Conduct data validation and cleansing to ensure data accuracy and consistency. i) Maintain detailed documentation of database configurations, procedures, and policies. j) Troubleshoot and resolve database-related issues in a timely manner to minimize downtime. k) Ensure compliance with applicable data protection and privacy regulations.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			l) Support scalability and integration requirements, including APIs and third-party systems.
7	UI/UX Designer	• B.E./B. Tech (CS/IT) or equivalent with 5+ Years of Exp. as a UI/UX Designer or similar role. • Strong portfolio showcasing previous design projects, particularly for web portal. • Proficiency in design tools like Figma, Adobe Illustrator, and Photoshop. • Strong understanding of information architecture, interaction design, and visual design principles.	a) Collaborate with the project manager and team to gather and evaluate user requirements. b) Illustrate design ideas through storyboards, process flows, and sitemaps. c) Design graphical user interface elements, including menus, tabs, and widgets. d) Create page navigation buttons and search fields to support an intuitive user experience. e) Develop UI mock ups and prototypes that clearly convey how sites will look and function. f) Present rough drafts to internal teams and key stakeholders. g) Conduct layout adjustments based on user feedback to enhance usability. h) Adhere to style standards on fonts, colours, and images to ensure consistency.
8	AI/ML Expert	• BE/BTech in Computer Science, Data Science, Artificial Intelligence, Machine Learning, Information Technology, Mathematics, Statistics with 5+ years of experience in a related field.	a) Design, develop, and deploy AI/ML models tailored to the requirements of the web portal or project use case. b) Identify relevant data sources, perform data preprocessing, and ensure high-quality datasets for model training and validation. c) Conduct exploratory data analysis (EDA) to derive meaningful insights and support data-driven decision-making. d) Select appropriate machine learning algorithms and frameworks (e.g., TensorFlow, PyTorch, Scikit-learn) based on project objectives. e) Fine-tune models using hyperparameter optimization techniques to enhance accuracy and performance.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			f) Integrate AI/ML models with web applications and backend systems using RESTful APIs or relevant tools. g) Continuously monitor model performance and retrain/update models as needed to address concept drift or data changes. h) Document model development processes, methodologies, and performance metrics for transparency and auditability. i) Collaborate with domain experts, developers, and data engineers to ensure seamless end-to-end AI/ML solution delivery. j) Ensure compliance with ethical AI practices and applicable data protection/privacy regulations. k) Provide technical support, troubleshooting, and performance optimization throughout the AI/ML model lifecycle. l) Stay updated with the latest advancements in AI/ML technologies, tools, and best practices.
9	Software Tester/Quality Assurance Engineer	BE/BTech in Computer Science, Information Technology, Electronics & Communication with 5+ years of experience in a related field.	a) Develop and execute detailed test plans, test cases, and test scripts based on functional and technical specifications. b) Perform various types of testing including functional, regression, integration, system, performance, and user acceptance testing (UAT). c) Identify, document, and track bugs or defects using appropriate tools (e.g., JIRA, Bugzilla, TestRail). d) Collaborate closely with developers, business analysts, and other stakeholders to ensure quality standards are met across the development lifecycle.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			e) Ensure thorough testing of web portals across multiple devices, browsers, and platforms to validate responsiveness and compatibility. f) Automate test cases using standard testing frameworks and tools (e.g., Selenium, JUnit, TestNG, Postman for API testing) wherever applicable. g) Validate that all functional and non-functional requirements are met and ensure end-to-end system reliability. h) Participate in review meetings to provide QA inputs and contribute to continuous improvement in testing processes. i) Maintain detailed documentation of testing processes, results, and issue logs for audit and compliance purposes. j) Ensure adherence to security, data privacy, and accessibility guidelines during testing activities. k) Support deployment and post-deployment testing to validate production readiness and stability. l) Stay updated on industry best practices and evolving testing methodologies and tools.
10	DevOps Engineer	• BTech/BE (Computer Science, Information Technology, Electronics, or related field.) • Minimum 5 years of experience in DevOps, system integration, CI/CD pipelines, and infrastructure automation.	a) Design and manage CI/CD pipelines for automated and reliable deployments. b) Set up, deploy and maintain development, testing, staging, and production environments. c) Implement infrastructure automation using tools like Python, Jenkins, Ansible, Terraform, or similar. d) Ensure secure deployment practices and compliance with required standards.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			e) Provide deployment support during UAT and go-live, including rollback and recovery mechanisms.
11	System Administrator	• BE/BTech/BCA in Computer Science, Information Technology, Electronics, or a related field. • Minimum 5 years of experience as System Administrator.	a) Install, configure, and maintain servers (Windows/Linux) and system software to ensure optimal performance. b) Monitor system health, performance, and resource utilization; proactively resolve bottlenecks and outages. c) Manage user accounts, access controls, roles, and permissions in line with organizational policies. d) Perform routine backups and restoration to ensure business continuity and data integrity. e) Apply operating system patches, updates, and configuration changes in a timely manner. f) Implement and manage security tools (firewalls, antivirus, intrusion detection systems) to safeguard systems. g) Troubleshoot hardware, software, and network-related issues to minimize downtime. h) Maintain network services including DNS, DHCP, FTP, HTTP, and email services. i) Ensure high availability, disaster recovery planning, and failover configurations for critical systems. j) Create and maintain detailed documentation of systems, configurations, and procedures. k) Support and manage virtualization platforms (e.g., VMware, Hyper-V) and cloud infrastructure as applicable. l) Coordinate with software vendors, OEMs, and third-party service providers for system upgrades and support.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			m) Monitor and enforce IT policies, data security guidelines, and compliance requirements (ISO, ITIL, etc.). n) Configure and manage enterprise tools such as Active Directory, Group Policy, and SCCM. o) Assist development and operations teams in deploying and maintaining environments for testing and production.
12	Database Engineer	• Bachelor's degree in computer science, Information Technology, Electronics, or a related field (B.E./B.Tech/B. Sc/BCA). • Minimum 5 years of experience as Database Engineer.	a) Design, develop, and maintain relational and non-relational database systems to ensure high performance and reliability. b) Create and optimize database schemas, tables, views, stored procedures, functions, and indexing strategies. c) Ensure data integrity, consistency, and security across all environments. d) Monitor database performance and implement tuning techniques to improve query execution and reduce response times. e) Plan and implement backup and recovery solutions to ensure business continuity and minimize data loss. f) Manage database access controls, roles, and permissions as per organizational policies. g) Work closely with developers and application teams to support data modeling and integration requirements. h) Implement and manage data replication, clustering, and high-availability configurations. i) Migrate databases across platforms and environments (on-premises to cloud or between cloud providers). j) Automate routine database tasks using scripting languages like Python, Shell, or PowerShell.

S.No	Type of Resource	Educational Qualification	Role and Responsibilities
			k) Ensure compliance with data governance, privacy laws, and regulatory standards (e.g., GDPR, HIPAA). l) Troubleshoot and resolve database-related issues such as performance bottlenecks, deadlocks, and failures. m) Maintain comprehensive documentation of database architectures, configurations, and standard operating procedures. n) Conduct regular audits and vulnerability assessments to ensure database security. o) Stay updated with the latest trends, tools, and technologies in database engineering and data infrastructure.

6.9. Payment terms, Deliverables and Timeline

Sl. No.	Project Phase	Milestone Deliverables /	Timeline (To be counted from date of contract) *M= Month	Milestone	Payment	Acceptance Criteria
1	Phase 1	Requirement Gathering, FRS and SRS	M1 - M3	Payment Milestone 1	10% of the total contract Value	Sign off and Approval from MoSPI based on the following: a. FRS and SRS report (covering all units at NAD) b. Exit Management Report
2		Database Design	M2 - M4			Successful Signoff report by the Committee Constituted at MoSPI
3		Legacy Data Migration	M3- M6			Successful Signoff report by the Committee Constituted at MoSPI
4		UAT of Data Migration through Data Base	M6-M7			Successful Signoff report by the Committee Constituted at MoSPI
5		Data Ingestion Dashboard & User Management Dashboard	M3-M7			Successful Signoff report by the Committee Constituted at MoSPI
6		UAT for Data Ingestion	M8-M9			Successful Signoff and Approval of UAT by the Committee Constituted at MoSPI

Sl. No.	Project Phase	Milestone Deliverables /	Timeline (To be counted from date of contract) *M= Month	Milestone	Payment	Acceptance Criteria
7		Go Live for Data Ingestion and User Management Dashboard	M9	Payment Milestone 2	10% of Total Contract Value	Sign off from MoSPI based on the following: a. Demonstration of Data Ingestion Dashboard and User Management Dashboard. b. Report on Data Migration & Database Design (Wireframes and Mock-ups) c. Audit Reports
8		Data Pipeline Development for different stages of Compilation Process with various Pre-Stage/Post-Stage Validations along with Notification Features and various other features defined in Scope of Work	M4-M10			
9		Data Processing Dashboard showing the clear view of various stages in	M6-M11			

Sl. No.	Project Phase	Milestone Deliverables /	Timeline (To be counted from date of contract) *M= Month	Milestone	Payment	Acceptance Criteria
		user friendly way for Data Pipeline along with data transformation journey followed where each Stage can be elaborated through dashboard to view the detailed steps followed in each stage, Reporting Dashboard & Visualizations				
10		UAT for Data pipeline, Processing Dashboard, Reporting Dashboard and Visualization	M9-M11			Successful Signoff and Approval of UAT by the Committee Constituted at MoSPI.
11		Go Live Processing Dashboard, Reporting Dashboard and Visualization	M12			Demonstration of Dashboards and Visualisations and Signoff by the Committee Constituted at MoSPI.
12		Successful Production Deployment (Go and Live)	M13	Payment Milestone 3	20 % of Total Contract Value	Sign off from MoSPI based on the following:

Sl. No.	Project Phase	Milestone Deliverables /	Timeline (To be counted from date of contract) *M= Month	Milestone	Payment	Acceptance Criteria
		Documentation and report Submission				a. UAT & Demonstration of Processing and Reporting Dashboard along with integration of BI tools. b. Training reports with User Manuals c. All document submission
13		Management Portal & Analytics Module, Requirement Gathering, FRS, SRS	M12-M14			
14		Management Portal Development & Analytics Module	M15-M20			
15		User Acceptance Testing, Sign Off, Document Submission and Go Live. Deployment & Integration of Helpdesk support system and Ticketing as well as Escalation	M21-M24	Payment Milestone 4	25% of Total Contract Value	Sign off from MoSPI based on the following: a. UAT Testing Report (Portal and Analytics) b. Deployment Report with requisite documentation c. Demo of Deployment & Integration of Helpdesk support system and Ticketing as well as Escalation

Sl. No.	Project Phase	Milestone Deliverables /	Timeline (To be counted from date of contract) *M= Month	Milestone	Payment	Acceptance Criteria
		Mechanism for issue reporting				Mechanism for issue reporting
17	Phase 2 (3 Years)	Operation & maintenance support	3 years after Go Live	Quarterly payment of proportionate O&M cost	The remaining 35% of the contract value shall be paid quarter wise during the O&M Phase	Sign off from MoSPI based on the following: a. O&M Reports b. SLA Reports (System Generated) c. Quarterly Performance Reports

****The payment during Development Phase would be 65% of the project cost and the rest 35% would be paid in the O&M phase.**

Notes:

- a) Deliverables of each module will be explained in FRS.
- b) UAT shall comprise of the functional and Non-functional aspects of the deliverables.
- c) Payment would be made in Indian Rupees, on a milestone basis.
- d) Selected BIDDER shall have to submit a self-certificate on completion of each milestone stating that "they have completed the milestone in line with the RFP specified terms & conditions."
- e) Permissible service levels and applicable penalties are defined in SLA.
- f) All payments are subject to deduction of applicable tax and service levels, and penalties, if any.
- g) No interest/charges will be paid on delayed payments.
- h) Any customization and changes in logic identified during the various stages of the project will not be considered as Change request and needs to be incorporated in the final delivery.
- i) The MoSPI may withhold part of the payment (not more than 20% of the payment due), the amount withheld shall be released, provided the shortfall in deliverables is fulfilled within the stipulated period prescribed by MoSPI.

- j) Committee constituted by MoSPI would be reviewing the quality of deliverables by the selected vendor on completion of each milestone and ascertain its completeness. This committee would be constituted for a period of 5 years and monitor the progress in this engagement.
- k) No TA/DA would be provided by MoSPI regarding travel requirement for implementation/support of the project within India and the same has to be borne by the bidder itself.
- l) In case of advance payment, if any, the same will be made against the Bank Guarantee of the equivalent amount.
- m) Selected Bidder is required to pay Salaries/wages of staff deployed at the client location. HR to provide an undertaking on monthly basis for staff deployed at client location during the O&M phase.

7. Service Level Agreement (SLA)

7.1. SLA Monitoring Tool

The selected bidder will provide an SLA Monitoring Tool (SMT) that provides end-to-end monitoring and management of the project's IT environment. The SMT must cover all infrastructure, applications, and automation platforms deployed under this engagement. In practice, this means the system will collect real-time data and alarms across servers, networks, storage, virtualization layers, containers, and cloud integrations to ensure availability and performance.

7.2. Infrastructure and Platform Monitoring

The SMT shall continuously monitor infrastructure components. This includes network devices, storage systems, hypervisors, container hosts, and cloud services. Monitoring involves collecting health and usage metrics (CPU, memory, disk, I/O, network, etc.) and logs from all these elements. By correlating these metrics, the SMT shall detect and alert on hardware faults, capacity bottlenecks, or network outages in real time, thereby minimizing downtime and supporting SLA compliance.

7.3. Application Performance Monitoring (APM)

The SMT tool must include application performance monitoring capabilities. Specifically, it should track key app-level metrics such as transaction throughput, response time, error rates, and utilization for each critical application and service. If the application's response time exceeds a set threshold or the error rate spikes, the SMT should generate an alert. This allows the team to rapidly diagnose issues (for example, slow database queries or service outages) before end users are affected.

7.4. Dashboards and Compliance Reporting

The SMT shall provide live dashboards and reporting interfaces. In addition to live monitoring, the tool must support scheduled compliance reporting. For example, it should generate periodic (e.g. monthly) reports summarizing SLA compliance, availability statistics, incident counts, and any violations. Automated dashboards and reports help improve operational efficiency and transparency. Importantly, all raw monitoring data behind these reports should be exportable so that auditors can independently verify the results.

7.5. Audit Trails and Compliance

All monitoring activities must be fully auditable. The SMT should maintain secure audit logs of user actions and system events (configuration changes, threshold edits, alert acknowledgments, etc.). The selected bidder must ensure that the department has unrestricted access to all audit logs and raw monitoring data for the entire retention period. Robust audit trails provide the organization with proof that no alerts or monitoring data were tampered with during the process.

7.6. Service Level Monitoring

This section defines Service Level Agreement (SLA) on various indicators, which will be considered by MoSPI for monitoring Service Level of the selected Bidder. The selected Bidder has to comply with defined Service Levels to ensure adherence to project timelines, quality and availability of services. Commencement of activities for MoSPI, shall be as per timelines and parameters stipulated by MoSPI in this RFP, failing which MoSPI may, at its discretion, impose penalties on the bidder as per the SLAs mentioned in this RFP. The purpose of this section is to clearly define the levels of service to be provided by the selected Bidder to MoSPI for the duration of this project or until this SLA has been amended. This SLA shall be part of

the agreement between the Bidder and the client. The SMT must automatically track SLA metrics and produce compliance reports. The tool should measure each metric continuously and generate real-time alerts whenever a metric breaches its target. An automated SLA monitoring tool should be deployed by the Bidder and access to be provided to MoSPI officials for monitoring purpose. The SMT should log every SLA violation and integrate them into reports. It must produce monthly SLA compliance reports for the department (and auditors), detailing actual uptime and performance versus targets, and include the raw monitoring data. The service level monitoring would be applicable during the entire course of the contract. MoSPI will frequently review the Service Levels and will have a discretion to amend the same.

7.7. SLA Specific Definitions:

- a) **Critical Time (CT):** This refers to the critical time period i.e., 06:00 hrs. to 23:59 hrs. where the concurrency is expected to be higher in comparison to the non-critical time period i.e., 00:00 hrs. to 05:59 hrs.
- b) **Non-Critical Time (NCT):** This refers to the non-critical time period i.e. 00:00 hrs. to 05:59 hrs. and the concurrency of registration may not be as high as critical period.
- c) **Uptime:** Uptime means, the aggregate number of hours in any specified time during which application/ and/or infrastructure is actually available for use.
$$\text{Uptime} = \{1 - [(\text{System Downtime}) / (\text{Total Time} - \text{Planned Maintenance Time})]\} * 100$$
- d) **Downtime/Outages:** Time period for which the specified services/ components /outcomes are not available in the concerned period, being considered for evaluation of SLA, which would exclude downtime owing to Force Majeure.
- e) **Scheduled Maintenance Time:** Pre-defined time period during which the specified services/components with specified technical and service standards will not be available due to scheduled maintenance activity. The selected Bidder is required to take at least 10 days prior approval from the designated authority for any such activity. The scheduled maintenance should be carried out during non-peak hours (like post mid-night and should not be for more than 2-4 hours and such planned downtime would be granted max 4 times in a year).
- f) **Denial of service:** For a given quarter during the O&M phase, if the total penalty amount is more than the amount due for that quarter, the same shall be considered as denial of service and in such a situation; client has the right to terminate the contract besides any other action as per the provisions of the contract.
- g) **Incident:** Incident refers to any event/abnormalities in the functioning of the application and/or infrastructure that may lead to disruption in normal operations of the MoSPI system application.

7.8. Helpdesk and Issue management related SLAs:

The Helpdesk and Issue management support with the help of ticketing system must ensure that the issues need to be handled at the earliest. Any delay of the same will have applicable penalty and may also lead to termination of contract.

Helpdesk and Issue management related SLA criteria (on the basis of criticality of the issue high, medium and low)			
S. No	Parameter	SLA	Deduction/Penalty
1.	Availability of ticketing for	As per decided timeline in this RFP	Nil

	issues/ complaints/ observations	Delay of every week beyond decided timeline	0.5 % of the contract value per week delay, up to 4 weeks of time. Beyond 4 weeks MoSPI reserves the right to terminate the contract.
2.	Any issue reported should be resolved within a time of maximum 24/48/72 hours.	Within 24/48/72 hours of the reporting of high/medium/low issue by MoSPI.	Nil
		After 24/48/72 hours of the reporting of high/medium/low issue by MoSPI	0.5 % of the contract value per day up to 1 week of time. Beyond 4-week MoSPI reserves the right to terminate the contract

Note: The timelines are indicative and exact timeline will be decided mutually based on severity of issue post onboarding of successful bidder.

7.9. Applicable SLAs during Development Phase:

Delay in Project Milestones	
Definition and Description	Timely delivery of all documents/items that are to be submitted as part of the Project deliverables. The deliverables are already listed in the RFP.
Service Level Requirement	a) All the deliverables defined in the RFP have to be submitted on-time. i) If any delay occurs, MoSPI will have the right to decide if the reason for delay was beyond the control of the Bidder and in such a case penalty will not be levied for that period. ii) If any deliverable is delayed because of its dependency on earlier deliverable (which was also delayed), then MoSPI will have the authority to decide the time for which the penalty should be relaxed/ levied. iii) This RFP specifies the timelines for submission of final version of the deliverables (i.e., after review by MoSPI). Selected Bidder is expected to make adequate provision for review process and shall submit the draft version of the deliverable much before the timeline. b) The key personnel deployed during the development phase of the project should not be replaced. c) In line with Do No. 209/CEO-GeM/2023 dated 24th August 2023 issued by the CEO, Government e-Marketplace (GeM), and pursuant to the applicable provisions of the Department of Expenditure guidelines, the Service Provider hereby undertakes and warrants that it shall not, under any circumstances, charge, recover, deduct, or otherwise seek any monetary or non-monetary consideration from the deployed manpower/resources engaged under this Contract. Any such practice, including but not limited to unlawful deductions from wages or seeking payments on any pretext, shall constitute a

	material breach of this Contract. The Service Provider further agrees that any violation of this undertaking shall render it liable for action under the GeM Incident Management Policy, including issuance of Show Cause Notice, imposition of penalties, termination of Contract, and/or debarment in accordance with Department of Expenditure O.M. No.F.1/20/2018-PPD dated 02.11.2021. The Buyer reserves the right to escalate incidents of non-compliance to GeM for appropriate remedial measures and enforcement. This clause shall form an integral part of the Service Level Agreement (SLA) and shall prevail over any conflicting terms contained elsewhere in this RFP.
Measurement of Service Level Parameter	Measured as the difference between the planned date for the milestone and the actual date of its completion.
Penalty for non-achievement of SLA Requirement	a) Delay in completion of milestone would attract penalty as per the following: i) 0.5% of contract value (development phase) per week of delay: Up to 4 weeks ii) 1% of contract value (development phase) per week of delay: Post 4 weeks iii) Beyond 8 weeks of delay, MoSPI reserves the right to terminate the contract. In case of delay in days, the penalty will be calculated on prorated basis. b) A penalty of 0.5 % would be levied on the total contract value of the development phase on replacement of Key Resources (Program Manager and Solution Architect) during the development period.

7.10. Applicable SLAs during Operation and Maintenance Phase:

7.10.1. Availability

MoSPI System/ Portal/Dashboard Availability	
Definition and Description	Availability of applications refers to the total time when the application is available to the users for performing all activities and tasks. The application should be accessible 24x7x365 days.
Service Level Requirement	The average availability of the application shall be at least 99% in a month, except during Critical Time (CT) when the average availability would be 99.5%. The same service levels will be applicable for a situation when operations are running from DR as well.

Measurement of Service Level Parameters	Uptime = {1- [(System Downtime)/ (Total Time - Planned Maintenance Time)]} * 100 Any planned application downtime shall NOT be included in the calculation of application availability. This would be measured as an average of every month and the applicable penalties will be levied in the pay-out of the impacted quarter. A log for planned down time should be maintained. In line with DO No. 209/CEO-GeM/2023 dated 24th August 2023 issued by the CEO, Government e-Marketplace (GeM), and pursuant to the applicable provisions of the Department of Expenditure guidelines, the Service Provider hereby undertakes and warrants that it shall not, under any circumstances, charge, recover, deduct, or otherwise seek any monetary or non-monetary consideration from the deployed manpower/resources engaged under this Contract. Any such practice, including but not limited to unlawful deductions from wages or seeking payments on any pretext, shall constitute a material breach of this Contract. The Service Provider further agrees that any violation of this undertaking shall render it liable for action under the GeM Incident Management Policy, including issuance of Show Cause Notice, imposition of penalties, termination of Contract, and/or debarment in accordance with Department of Expenditure O.M. No.F.1/20/2018-PPD dated 02.11.2021. The Buyer reserves the right to escalate incidents of non-compliance to GeM for appropriate remedial measures and enforcement. This clause shall form an integral part of the Service Level Agreement (SLA) and shall prevail over any conflicting terms contained elsewhere in this RFP.												
Penalty for non-achievement of SLA Requirement	If the Bidder is not able to meet the above defined service level requirement, then any deviation from the same would attract a penalty as per the following. <table><tr><th colspan="4">Application Availability during Critical Time (CT)</th></tr><tr><td>Monthly average</td><td>99.9% to 99.5 %</td><td><99.5% to 99%</td><td>< 99%</td></tr><tr><td>Penalty</td><td>1 % of the Quarterly pay-out</td><td>2 % of the Quarterly pay-out</td><td>3 % of the Quarterly pay-out for each % below 99%</td></tr></table>	Application Availability during Critical Time (CT)				Monthly average	99.9% to 99.5 %	<99.5% to 99%	< 99%	Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out for each % below 99%
Application Availability during Critical Time (CT)													
Monthly average	99.9% to 99.5 %	<99.5% to 99%	< 99%										
Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out for each % below 99%										

	Application Availability During Non-Critical Time (NCT)			
	Monthly average*	99.5% to 99 %	<99% to 98%	<98%
	Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out for each % below 98%
* If the application is consistently below 95% continuously for two or more months duration, then MoSPI reserves the right for termination of contract in part or full of the selected bidder.				

7.10.2. System Performance SLA

MoSPI Portal Response Time – for reasons attributable to selected bidder and Not on Cloud Service Provider				
Definition and Description	Application response time refers to the total time that the application takes to load the requested page			
Service Level Requirement	The application response (on fixed internet) time for users should not exceed. Average loading time for all pages – 1 sec Functionality screen load – 1 Sec Uploading/ downloading of documents (1 MB doc)– 4 sec The application response time (on WI-FI Internet) for users should not exceed. Average loading time for all pages – 2 sec Functionality screen load – 2 sec Uploading/ downloading of documents (1 MB doc) – 6 sec.			
Measurement of Service Level Parameter	Application response time will be measured based on automated reports. The data should be captured through automated tools. Any scheduled downtime should not be included in the calculation of application response time. SLA reports are to be calculated and submitted on monthly basis, however, deduction and final pay-out to happen on a quarterly basis.			
Penalty for non-achievement of SLA Requirement	If the selected bidder is not able to meet the above defined service level requirement for 95% of the cases, then any deviation from the same would attract a penalty as per the following –			
	Average loading time for all pages			
	Monthly Average	95% to 93%	<93% to 91%	<91 %
	Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out
	Functionality screen load			
	Monthly Average	95% to 93%	<93% to 91%	<91%

	Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out												
	<table><tr><td colspan="3">Uploading/ downloading of documents</td><td></td></tr><tr><td>Quarterly Average</td><td>95% to 93%</td><td><93% to 91%</td><td><91%</td></tr><tr><td>Penalty</td><td>1 % of the Quarterly pay-out</td><td>2 % of the Quarterly pay-out</td><td>3 % of the Quarterly pay-out</td></tr></table>				Uploading/ downloading of documents				Quarterly Average	95% to 93%	<93% to 91%	<91%	Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out
Uploading/ downloading of documents																
Quarterly Average	95% to 93%	<93% to 91%	<91%													
Penalty	1 % of the Quarterly pay-out	2 % of the Quarterly pay-out	3 % of the Quarterly pay-out													

7.11. Exclusions (for penalty calculation)

- a) The Bidder will be exempted from any delays or slippages on SLA parameters arising out of following reasons:
 - i. The non-compliance to the SLA other than for reasons beyond the control of the bidder. Any such delays will be notified in writing to MoSPI by selected bidder, decision whether it will not be treated as breach of SLA or not shall be discretion of MoSPI.
 - ii. If there is a force majeure event declared by the Government of India/MeiTY/MoSPI effecting the SLA which is beyond the control of the selected bidder.

7.12. SLA Monitoring and Auditing:

- a) MoSPI will review the performance of bidder against the SLA parameters, quarterly or monthly, or at any periodicity defined in this RFP document or as decided by MoSPI at a later stage.
- b) The review/ audit report will form basis of any action relating to imposing penalty or breach of terms and conditions of work order. Any such review/ audit can be scheduled or unscheduled. The results will be shared with the selected bidder as soon as possible.
- c) MoSPI reserves the right to appoint a third-party auditor to validate the SLA.

7.13. Maximum Penalty to Bidder for the SLA:

The maximum penalty at any point of time on an additive basis shall not exceed 10% of the Commercial Bid submitted by the selected bidder. If during the contract period, the penalty exceeds 10% of contract value MoSPI reserves the right to terminate the contract and or forfeiture of PBG.

8. General Terms and Conditions:

8.1. Earnest Money Deposit

Bidders shall submit, along with their Proposals, EMD i.e. Rs. 60,00,000/- in the form of Bank Guarantee in favour of '**Pay and Accounts Officer, Ministry of Statistics and Programme Implementation (MoSPI), payable at New Delhi**', and should be valid for until the final bid validity period with a claim period of 3 months after the expiry of validity of the Bank Guarantee issued in the name of MoSPI.

The EMD amount is interest free and will be refundable to the unsuccessful bidders within 30 days after the award of the contract without any accrued interest on it. The EMD, for the amount mentioned above, of successful Bidder would be returned after signing of Contract and submission of Performance Guarantee/Security.

The EMD may be forfeited:

- a) If Bidder withdraws its Proposal during the period of Proposal validity.
- b) In case of a successful Bidder, if the Bidder fails to sign the contract in accordance with this RFP.

The scanned copy of the Bank Guarantee or DD to be uploaded in GeM portal and the hard copy of the BG / DD must reach at NAD, MoSPI Khurshid Lal Bhawan, Janpath, New Delhi – 110001" before last date of submission of bid along with other documents.

8.2. Performance Bank Guarantee

- a) MoSPI will require the selected Bidder to provide a Performance Security in the form of an unconditional and irrevocable bank guarantee from a scheduled commercial bank in India in favour of '**Pay and Accounts Officer, Ministry of Statistics and Programme Implementation, payable at New Delhi**', within 15 days from the notification of award, **for a value equivalent to 5% of the cost discovered through the tender process**, rounded up to the nearest of the nearest thousand Indian Rupees. The Performance Guarantee should be valid for a **period of 60 days beyond the completion of all contractual obligations**.
- b) The Performance Guarantee shall be kept valid till completion of the project in case of extension. The Performance Guarantee shall contain a claim period of three months from the last date of validity.
- c) The selected Bidder shall be responsible for extending the validity date and claim period of the Performance Guarantee as and when it is due on account of non-completion of the Services and Warranty period.
- d) In case the selected Bidder fails to submit performance guarantee within the time stipulated, the MoSPI at its discretion may cancel the order placed on the selected Bidder without giving any notice.
- e) The MoSPI shall forfeit the performance guarantee in case the selected Bidder fails to discharge their contractual obligations during the period or the MoSPI incurs any loss due to Bidder's negligence in carrying out the project implementation as per the terms & conditions specified in the Contract Agreement.

8.3. Late Bids

The bids received after due date of submission of bids shall summarily be rejected.

- a) Bid Submission: The last date for submission of Bids would be as specified above in the factsheet and no change with respect to bid submission would be entertained afterwards.

b) Authentication of Proposals:

A proposal should be accompanied by a power-of-attorney (in the given format) in the name of the signatory of the Proposal or a copy of Board Resolution certified by the Company Secretary.

8.4. Right to Accept/Reject any Proposal & Terminate the Process

- a) The MoSPI may terminate the RFP process at any time and without assigning any reason. The MoSPI makes no commitment, expressed or implied, that this process will result in a business transaction with anyone. MoSPI also reserves the right to accept/reject any proposal without any grounds for providing justification to the Bidder.
- b) This RFP does not constitute an offer by the MoSPI.

8.5. General Terms

- a) It is clarified that the scope of work is not exhaustive, and that the Solution Development team will undertake such other tasks, within the scope of the RFP, as may be necessary

to implement the scope and the project efficiently and effectively to achieve the desired outcomes of the project.

- b) The working hours of the Bidder will be co-terminus with the working hours of MoSPI.
- c) The Bidder shall be required to sensitize the employees about the need of maintaining absolute data secrecy and take every possible step to ensure that data either in paper form or in digitized form, are not misused, not published online, not put in the public domain and not transmitted in such digital form which can be intercepted or searched through internet search engines.
- d) The Bidder shall not, without prior written consent from the MoSPI, disclose the Contract, or any provision thereof, or any specification, plan, drawing, pattern, sample, or information furnished by or on behalf of the MoSPI in connection therewith, to any person other than a person employed by the Bidder in the performance of the Contract. Disclosure to any such employed person shall be made in confidence and shall extend only so far, as may be necessary for purposes of such performance.
- e) The Bidder shall not, without prior written consent of the Ministry, use any document or information made available for the project, except for performing the Contract.
- f) All project-related documents, other than the Contract itself, shall remain the property of the MoSPI and shall be returned (in all copies)/source code/documents to the MoSPI on completion of the Bidder services under the contract if so, required by the MoSPI.
- g) The selected bidder is required to supply the entire source code, configuration, and data migration scripts, and must impart knowledge and materials to the bidder's team. All utilized third-party components must be explicitly stated.

8.6. Confidentiality

- a) Information relating to the evaluation of proposals and recommendations concerning awards shall not be disclosed to the bidders who submitted the proposals or to other persons not officially concerned with the process, until the publication of the award of the contract.
- b) The undue use by any Bidder of any information related to the process may result in the rejection of its Proposal and may be subject to the provisions of the Client's anti-fraud and corruption policy.

8.7. Dispute Resolution

- a) The Bidder and MoSPI shall endeavour their best to amicably settle, by direct negotiation, all disputes arising out of or in connection with the contract.
- b) In case any dispute between the Parties, does not settle by negotiation, the same may be resolved exclusively by arbitration and such dispute may be submitted by either party for arbitration. Arbitration shall be held in New Delhi and conducted in accordance with the provisions of Arbitration and Conciliation Act, 1996 or any statutory modification or re-enactment thereof. Each Party to the dispute shall appoint one arbitrator each and the third to be appointed by the Department of Information Technology, Government of India.
- c) The "Arbitration Notice" should accurately set out the disputes between the parties, the intention of the aggrieved party to refer such disputes to arbitration as provided herein, the name of the person it seeks to appoint as an arbitrator with a request to the other party to appoint its arbitrator within 45 days from receipt of the notice. All notices by one party to the other in connection with the arbitration shall be in writing and be made as provided in this RFP document.
- d) Each Party shall bear the cost of preparing and presenting its case, and the cost of arbitration, including fees and expenses of the arbitrators, shall be shared equally by the

Parties unless the award otherwise provides. The Bidder shall not be entitled to suspend the Service/s or the completion of the job, pending resolution of any dispute between the Parties and shall continue to render the Service/s in accordance with the provisions of the Contract/Agreement notwithstanding the existence of any dispute between the Parties or the subsistence of any arbitration or other proceedings.

8.8. Applicable Law

The Bidder shall be governed by the laws and procedures established by Govt. of India, within the framework of applicable legislation and enactment made from time to time concerning such commercial dealings/processing. All procedures laid down in GFR and DFPR shall be adhered-to strictly by the MoSPI and subordinates and Bidders are bound to respect the same.

8.9. Labour Law

The Bidder shall comply with all the provisions of Indian Labour Laws and industrial laws in respect of the manpower employed thereof be governed by the laws and procedures established by Govt. of India, within the framework of applicable legislation and enactment made from time to time concerning such commercial dealings/ processing.

8.10. Information Security

- a) The selected bidder shall not carry and/or transmit any material, information, application details, equipment, or any other goods/material in physical or electronic form, which are proprietary to or owned by MoSPI, out of premises without prior written permission from MoSPI.
- b) The selected bidder to acknowledge that MoSPI's business data and other MoSPI proprietary information or materials, whether developed by MoSPI or being used by MoSPI pursuant to a license agreement with a third party (the foregoing collectively referred to herein as "proprietary information") are confidential and proprietary to MoSPI; and the selected bidder agrees to use reasonable care to safeguard the proprietary information and to prevent the unauthorized use or disclosure thereof, which care shall not be less than that used by the selected bidder to protect its own proprietary information.
- c) The selected bidder shall recognize that the goodwill of MoSPI depends, among other things, upon selected bidder keeping such proprietary information confidential and that unauthorized disclosure of the same by selected bidder could damage MoSPI and that by reason of selected bidder's duties hereunder. Selected bidder may come into possession of such proprietary information, even though selected bidder does not take any direct part in or furnish the services performed for the creation of said proprietary information and shall limit access thereto to employees with a need to such access to perform the services required by this agreement. Selected bidder shall use such information only for the purpose of performing the said services.
- d) The selected bidder shall, upon termination of this agreement for any reason, or upon demand by MoSPI, whichever is earliest, return all information provided to the selected bidder by MoSPI, including any copies or reproductions, both hardcopy and electronic.
- e) The selected bidder will not disclose any information, to anyone in any form about software, hardware, network topology, IP Schema, and network security policies of MoSPI. Information disclosure to anyone shall be only with prior written consent of MoSPI. A separate "Non-Disclosure Agreement" as per Form - 8 shall be signed within 1 week after receiving a work order.

8.11. Force Majeure

For the purposes of this engagement, "Force Majeure" means an event which is beyond the reasonable control of a Party, is not foreseeable, is unavoidable and not brought about by or at the instance of the Party claiming to be affected by such events and which has caused the non-performance or delay in performance, and which makes a Party's performance of its obligations hereunder impossible or so impractical as reasonably to be considered impossible in the circumstances, and includes, but is not limited to, war, riots, civil disorder, earthquake, fire, explosion, storm, flood or other extreme adverse weather conditions, strikes, lockouts or other industrial action (except where such strikes, lockouts or other industrial action are within the power of the Party invoking Force Majeure to prevent), confiscation or any other action by Government agencies. Force Majeure shall not include:

- a) Any event which is caused by the negligence or intentional action of a Party or by/of such Party's agents or employees, nor
- b) Any event which a diligent Party could reasonably have been expected both to consider at the time of the conclusion of this engagement and avoid or overcome in the carrying out of its obligations hereunder. iii. Force Majeure shall not include insufficiency of funds or inability to make any payment required hereunder.

8.12. New Development on Mutual Terms

MoSPI may, based on its strategic or operational requirements, request modifications, additions, or changes to the scope of the Project, Services, or Deliverables during any phase of this engagement. Any regular tasks including but not limited to addition of processing modules, integration of analysis tools, dashboards, innovate web forms/activities in the developed software/application will not be considered as part of change/additional development and will have to be completed by the selected Bidder at no additional cost (even if it requires any enhancements/customizations).

8.13. Abnormally Low Bids

An Abnormally Low Bid/Proposal is one in which the Bid/Proposal price, in combination with other elements of the Bid/Proposal, appears so low that it raises material concerns as to the capability of the Bidder/Bidder to perform the contract at the offered price. If the rates/prices finalised with successful Bidder(s) are found to be having a variation of more than (-) 25% in relation to Employer's estimate of the cost of work to be performed under the contract, then such work shall be identified as "Abnormally Low Bid (ALB)". If any bidder quoted the rates abnormally below the estimated tender value, the same shall be summarily rejected by the client without assigned any reason thereof and the decision of client shall be final.

8.14. Indemnity

- a) The selected Bidder shall indemnify MoSPI against any liability incurred on account of any default by the selected Bidder or manpower deployed by it.
- b) The selected Bidder shall indemnify and defend the MoSPI against all third-party claims of infringement of patent, trademark/copyright or industrial design rights arising from the use of the supplied software, design architecture, templates, layouts, documents, other artefacts, deployed resources and related services or any part thereof ("Deliverables").
- c) MoSPI stand indemnified from any employment claims that the engaged Manpower/Resources may opt to have towards the discharge of their duties in the fulfilment of the Work Orders.
- d) Each party also stands indemnified from any compensation arising out of accidental loss of life or injury sustained by such party's manpower while discharging their duty towards

fulfilment of the Work Orders caused by the negligence or willful misconduct of the other Party or its agents and representatives.

8.15. Limitation of Liability

Except conditions enumerated in Indemnity Clause, the damage caused by the Bidder to MoSPI under any work order issued pursuant to this agreement, the Bidder shall be liable to end user / MoSPI for damage and loss to the maximum extent of the work order value. Bidder shall be liable for all acts of omission and commission by its employees deployed under this agreement and MoSPI stands insulated against aggrieved third-party complaints against any civil or criminal actions of the Bidder or its employees.

8.16. Integrity Pact/Non-Disclosure Agreement

- a) In compliance with the Central Vigilance Commissioner Circular No. 06/05/21 dated 3rd June 2021 regarding adaptation of Integrity Pact- Revised Standard Operating Procedure to ensure transparency, equity and competitiveness in public procurement, the Bidder(s)/Bidder(s)/Prospective vender(s) are required to sign an Integrity Pact (IP) with MoSPI.
- b) The pact is essentially an agreement between the Bidder(s)/ Bidder(s)/Prospective Bidder(s) and the MoSPI, committing the persons/Officials of both sides, not to resort to any corrupt practices in any aspect/stage of the contract. Only those selected Bidders, who commit themselves to such a pact with the MoSPI, would be considered competent to participate in the bidding process.
- c) The selected Bidders are required to enter in an Integrity Pact with the Purchaser. For this, the Bidder shall submit the original signed and stamped Integrity Pact as part of technical bids, failing which the bids would not be considered for evaluation for such selected and may Bidders get disqualified.
- d) Further, any violation of Integrity pact would entail disqualification of the Bidder(s)/Bidder(s) and exclusion from MoSPI's future bidding process for two years and execution of Bid Securing Declaration Form of such Bidder(s)/Bidder(s).

8.17. Confidential Information, Security and Data

The selected bidder will promptly on the commencement of the exit management period supply to MoSPI the following:

- a) Information relating to the current services rendered and performance data relating to the performance of sub-contractors in relation to the services.
- b) Documentation relating to Project's Intellectual Property Rights.
- c) Project data and confidential information and all current and updated Project data as is reasonably required for purposes of Project or its nominated agencies transitioning the services to its Replacement bidder in a readily available format specified by MoSPI.
- d) All other information (including but not limited to documents, records and agreements) relating to the services reasonably necessary to enable Project or its nominated agencies, or its Replacement bidder to carry out due diligence in order to transition the provision of the Services to Project.
- e) Before the expiry of the exit management period, the selected bidder shall deliver to MoSPI all new or up-dated materials from the categories set out above and shall not retain any copies thereof.
- f) On request by the MoSPI, the selected bidder shall effect such assignments, transfers, licenses and sub-licenses as the MoSPI may require in Favor of the MoSPI, or its Replacement selected bidder in relation to any equipment, lease, maintenance or service provision agreement between selected bidder and third party lessors, vendors, and which

are related to the services and reasonably necessary for the carrying out of replacement services by the MoSPI or its Replacement Implementation bidder.

- g) Selected bidder shall clearly transfer all knowledge related to the project and its operations and specifically share with MoSPI and its authorized agent(s) so nominated, the learnings of the project and approach that was adopted in managing project performance, meeting risks and how specific technical situations were handled in O&M. These should be as far as possible through a documented form supported by other interactive methods.
- h) In the event of termination or expiry of agreement, Project Implementation, or Operation and Management SLA, each Party shall comply with the Exit Management Plan and O&M.
- i) During the exit management period, the selected bidder shall continue to deliver the Services.
- j) Each Exit Management Plan shall be presented by the selected bidder to and approved by the MoSPI or its nominated agencies. As part of this requirement the selected bidder shall provide all supporting information and reasonable access to verify / audit the submissions made in the Exit Management Plan including but not limited to what has been described any time during the validity of the Agreement.

9. Exit Management

This clause sets out the provisions, which will apply during the Exit Management period. The Parties shall ensure that their respective associated entities carry out their respective obligations set out in this Exit Management Clause.

The exit management period starts, in the case of expiry of contract, at least 3 months prior to the date when the contract comes to an end or in case of termination of contract, on the date when the notice of termination is sent to the selected bidder. The exit management period ends on the date agreed upon by MoSPI or three months after the beginning of the exit management period, whichever is earlier.

9.1. Exit Management Plan

The selected bidder shall submit an "Exit Management Plan" to MoSPI, which shall deal with at least the following aspects of exit management in relation to the SLA as a whole and in relation to scope of work and RFP terms.

- a) A detailed program of the transfer process that could be used in conjunction with a Replacement Bidder including details of the means to be used to ensure continuing provision of the services throughout the transfer process or until the cessation of the services and of the management structure to be used during the transfer.
- b) Plans for the communication with such of the selected bidder, staff, customers and any related third party as are necessary to avoid any material detrimental impact on Project's operations because of undertaking the transfer.
- c) Exit Management Plan shall be presented by the selected bidder too and approved by MoSPI or its nominated agencies.
- d) Continuity and performance of the Services at all times including the duration of the Agreement and post expiry of the Agreement is a critical requirement of MoSPI. It is the prime responsibility of the selected bidder to ensure continuity of service at all times of the Agreement including exit management period and in no way any facility/service shall be affected/degraded. Further, selected bidder is also responsible for all activities required to train and transfer the knowledge to the Replacement bidder to ensure similar continuity and performance of the Services post expiry of the Agreement.

- e) Selected bidder will be required to carry out a gap analysis of the facilities and arrangements made by the Replacement bidder and specifically inform MoSPI. This Schedule sets out the mechanisms for Exit Management Services which the selected bidder has to provide on termination or prior to expiration or of the Agreement to allow the orderly and efficient transition of the Services to MoSPI or its nominee.
- f) Notwithstanding anything contained in this Agreement, the task of selected bidder with reference to the Exit Management is deemed to be complete only when MoSPI issues a satisfactory completion certificate for the Exit Management.
- g) In case selected bidder desires to close or shut down its business then in that case, selected bidder shall inform MoSPI at least three (3) months before closing its business. Failure on the part of selected bidder in informing MoSPI about its intention to close its business shall make MoSPI entitled to claim compensation and invoke the Performance Bank Guarantee.
- h) The exit management services will be available to MoSPI or its nominees or the Replacement bidder till all tasks set out in the Exit Management Plan (which has been duly approved in writing by MoSPI) have been completed to the satisfaction of MoSPI.

The terms of payment as stated in the Terms of Payment Schedule include the costs of the selected bidder complying with its obligations under this Schedule.

9.2. Transfer of Assets

- a) Selected bidder shall transfer all rights, titles and interests in the System Software to MoSPI or its nominees within 30 days from their acquisition (or at such time on or before the Go-Live date as specified by MoSPI on its sole discretion) along with all artifacts including but not limited to licenses, user manuals, versions/enhancements, standard operating procedures and other information. Further, selected bidder undertakes that the licenses of all the System Software for the purpose of the Project should be procured in the name of MoSPI and executes such deeds and documents as may be necessary for the aforesaid purposes including completing all legal or other formalities required in this regard.
- b) Selected bidder shall transfer all rights, titles and interests in the Application Software to MoSPI or its nominees on Go-live Date of each phase(s) along with all artifact including but not limited to licenses, user manuals, versions/enhancements, standard operating procedures and other information and execute such deeds and documents as may be necessary for the aforesaid purposes including completing all legal or other formalities required in this regard
- c) Selected bidder shall transfer all rights, titles and interests in the Hardware to POs or its nominees within 30 days from the Go-Live date of each phase(s) along with all artifact including but not limited to licenses, user manuals, versions/enhancements, standard operating procedures and other information and O&M for MoSPI and execute such deeds and documents as may be necessary for the aforesaid purposes including completing all legal or other formalities required in this regard.
- d) In case the Agreement is terminated, MoSPI shall take over all the System Software, Application software and Hardware used for the purpose of Project. All the remaining Assets, which still remain to be transferred at the time of exit, shall be transferred by selected bidder to MoSPI, latest by the last day of the exit management period to MoSPI and selected bidder shall hand over the possession of the assets and related documents and information.
- e) It is hereby clarified that in respect of the System and Application Software, ownership includes all updates and enhancements of that software.
- f) In case the Assets to be transferred are mortgaged to any financial institutions by the selected bidder, the selected bidder shall ensure that all such liens and liabilities have

been cleared beyond doubt, prior to such transfer. All documents regarding the discharge of such lien and liabilities shall be furnished to the MoSPI.

- g) Selected Bidder hereby agrees that, even after the Assets has been transferred and/or handed over to MoSPI, operation and management responsibilities in respect of these Assets shall be borne by the selected bidder during the term of the agreement. Pursuant to this Article, all operation and management responsibility relating to the Asset shall be transferred to MoSPI, on the last day of the exit management period.
- h) In case the Assets reaches the 'end of the support', 'end of the sale' and 'end of the life' during the term of the Agreement, selected bidder will be duty bound to replace such Assets during the term of the Agreement and exit management period with no additional cost.
- i) Selected bidder warrants and represents that it shall procure and manage the comprehensive insurance for all the Assets during the term of the Agreement even after the Assets has been transferred and/or handed over to MoSPI and shall bear all the risk on Assets for the entire term of the Agreement.
- j) The selected bidder will pass on to MoSPI and/or to the Replacement bidder, the subsisting rights in any leased properties/ licensed products/insurance policies/warranties/ AMCs/CMCs on terms not less favourable to MoSPI.

Form 1: Letter of Technical Proposal Submission Form

To,
Deputy Director General (DDG)
NAD, MoSPI
Khurshid Lal Bhawan,
Janpath, New Delhi – 110001.

Dear.....,

We, the undersigned, offer to provide development services to _____ in accordance with your Request for Proposals. We are hereby submitting our Proposal, which includes both Technical and Financial Proposals separately.

We hereby declare that:

- a) All the information and statements made in this Proposal are true, and we accept that any misinterpretation or misrepresentation contained in this Proposal may lead to our disqualification by the Client.
- b) Our Proposal shall be valid and remain binding upon us for the period of 180 days from the date of submission of the Proposal as stipulated in the agreement.
- c) We have no conflict of interest in accordance with the agreement.
- d) We meet the eligibility requirements as stated in the agreement, and we confirm our understanding of our obligation to abide by the policy on Code of Integrity of Public Procurement regarding corrupt and fraudulent practices as per the agreement.
- e) We, along with the team members proposed for the said assignment, are not subject to, and/ or not controlled by any entity or individual that is subject to, a temporary suspension or a debarment imposed by any offices of the Government of India/ State Govts / UTs.
- f) In competing for (and, if the award is made to us, in executing) the Contract, we undertake to observe the laws against fraud and corruption, including bribery, in force in the country of the Client and shall abide by the Code of Integrity for Public Procurement as per the agreement.
- g) We undertake to negotiate a Contract based on the Proposal. We accept that the substitution of Key Experts, without the previous consent of MoSPI, during the Proposal validity period may lead to the termination of Contract negotiations.
- h) Our Proposal is binding upon us and subject to any modifications resulting from the Contract negotiations.

We undertake, if our Proposal is accepted and the Contract is signed, to initiate the Services related to the assignment no later than the dates indicated in the agreement.

We understand you are not bound to accept any Proposal you receive.

Yours sincerely,

Authorized Signature (*In full and initials*): _____

Form 8: Format for Non-Disclosure Agreement

(To be submitted as part of the technical proposal, to be executed on a non-judicial stamped paper of requisite value based on place of execution)

This Non-Disclosure Agreement ("Non-Disc") is made and entered into _____ day of _____ month _____ year (effective date) by and between MoSPI ("Department") and _____ ("Company")

Whereas, Department and Company have entered into an Agreement _____ effective _____ for _____;
AND

Whereas each party desires to disclose to the other party certain information in oral or written form, which is proprietary and confidential to the disclosing party, ("CONFIDENTIAL INFORMATION"). The confidentiality obligations shall survive the termination of this Contract.

NOW, THEREFORE, in consideration of the foregoing and the covenants and agreements contained herein, the parties agree as follows:

Definitions. As used herein:

The term "Confidential Information" shall include, without limitation, all information and materials, furnished by either Party to the other in connection with citizen/ users/ persons/ customers data, products and/ or services, including information transmitted in writing, orally, visually, (e.g. video terminal display) or on magnetic or optical media, and including all proprietary information, customer lists, trade secrets, trade names or proposed trade names, methods and, licensed document know-how, ideas, concepts, and other intellectual property relating to the disclosing party's data, computer database, products and/ or services. Results of any tests, sample surveys, analytics, data mining exercises or usages etc. carried out by the receiving party in connection with the Department's Information including citizen/ users/ persons/ customers personal or sensitive personal information as defined under any law for the time being in force shall also be considered Confidential Information.

The term "Department" shall include the officers, employees, agents, consultants, contractors and representatives of the MoSPI.

The term, "Company" shall include the directors, officers, employees, agents, consultants, contractors and representatives of Company, including its applicable affiliates and subsidiary companies.

Protection of Confidential Information. With respect to any Confidential Information disclosed to it or to which it has access, Company affirms that it shall:

Use the Confidential Information as necessary only in connection with Project and in accordance with the terms and conditions contained herein.

Maintain the Confidential Information in strict confidence and take all reasonable steps to enforce the confidentiality obligations imposed hereunder, but in no event take less care with the Confidential Information that the parties take to protect the confidentiality of its own proprietary and confidential information and that of its clients.

Not to make or retain copy of any citizen/ users/ persons/ customers database, Proposals developed by or originating from Department or any of the prospective clients of Department except as necessary, under prior written intimation from Department, in connection with the Project, and ensure that any such copy is immediately returned to Department even without express demand from Department to do so.

Not disclose or in any way assist or permit the disclosure of any Confidential Information to any other person or entity without the express written consent of the other party; and

Return to the other party, or destroy, at Department's discretion, any and all Confidential Information disclosed in oral/ printed form or other permanent record, or in any other tangible form (including without limitation, all copies, notes, extracts, analyses, studies, summaries, records and reproductions thereof) immediately upon the earlier to occur of (i) expiration or termination of either party's engagement in the Project, or (ii) the request of the other party therefore.

Not to discuss with any member of the public, media, press, any or any other person about the nature of arrangement entered between Department and Company or the nature of services to be provided by the Company to the Department.

Onus - Company shall have the burden of proving that any disclosure or use inconsistent with the terms and conditions hereof falls within any of the following exceptions.

Exceptions - These restrictions as enumerated in this Agreement shall not apply to any Confidential Information:

Which is independently developed by Company or lawfully received from another source free of restriction and without breach of this Agreement; or

After it has become generally available to the public without breach of this Agreement by Company; or

Which at the time of disclosure to Company was known to such party free of restriction and evidenced by documentation in such party's possession; or

Which Department agrees in writing is free of such restrictions.

Which is received from a third party not subject to the obligation of confidentiality with respect to such Information.

Remedies - Company acknowledges that (a) any actual or threatened disclosure or use of the Confidential Information by Company would be a breach of this agreement and may cause immediate and irreparable harm to Department; (b) Company affirms that damages from such disclosure or use by it may be impossible to measure accurately; and (c) injury sustained by Department may be impossible to calculate and remedy fully. Therefore, Company acknowledges that in the event of such a breach, Department shall be entitled to specific performance by Company of Company's obligations contained in this Agreement. In addition, the Company shall indemnify the Department of the actual and liquidated damages which may be demanded by the Department. Moreover, the Department shall be entitled to recover all costs (including reasonable attorneys' fees) which it or they may incur in connection with

defending its interests and enforcement of legal rights arising due to a breach of this agreement by the Company.

Need to Know. Company shall restrict disclosure of such Confidential Information to its employees and/ or consultants with a need to know (and advise such employees of the obligations assumed herein), shall use the Confidential Information only for the purposes set forth in the Agreement, and shall not disclose such Confidential Information to any affiliates, subsidiaries, associates and/ or third party without prior written approval of the disclosing party.

Intellectual Property Rights Protection - No license to a party, under any trademark, patent, copyright, design right, mask work protection right, or any other intellectual property right is either granted or implied by the conveying of Confidential Information to such party.

No Conflict - The parties represent and warrant that the performance of its obligations hereunder does not and shall not conflict with any other agreement or obligation of the respective parties to which they are a party or by which the respective parties are bound.

Authority - The parties represent and warrant that they have all necessary authority and power to enter into this Agreement and perform their obligations hereunder.

Dispute Resolution - If any difference or dispute arises between the Department and the Company in connection with the validity, interpretation, implementation or alleged breach of any provision of this Agreement, any such dispute shall be referred to MoSPI.

The arbitration proceedings shall be conducted in accordance with the (Indian) Arbitration & Conciliation Act, 1996 & amendments thereof.

The place of arbitration shall be the New Delhi.

The arbitrator's award shall be substantiated in writing and binding on the parties.

The proceedings of arbitration shall be conducted in English language.

The arbitration proceedings shall be completed within a period of 180 days from the date of reference of the dispute to arbitration.

Governing Law - This Agreement shall be interpreted in accordance with and governed by the substantive and procedural laws of India and the parties hereby consent to the exclusive jurisdiction of Courts and/ or Forums situated at New Delhi, India only.

Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties, and supersedes all previous or contemporaneous agreement or communications, both oral and written, representations and understandings among the parties with respect to the subject matter hereof.

Amendments - No amendment, modification and/ or discharge of this Agreement shall be valid or binding on the parties unless made in writing and signed on behalf of each of the parties by their respective duly authorized officers or representatives.

Binding Agreement - This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns.

Severability - It is the intent of the parties that in case any one or more of the provisions contained in this Agreement shall be held to be invalid or unenforceable in any respect, such provision shall be modified to the extent necessary to render it, as modified, valid and enforceable under applicable laws, and such invalidity or unenforceability shall not affect the other provisions of this Agreement.

Waiver - If either party should waive any breach of any provision of this Agreement, it shall not thereby be deemed to have waived any preceding or succeeding breach of the same or any other provision hereof.

Survival - Both parties agree that all their obligations undertaken herein with respect to Confidential Information received pursuant to this Agreement shall survive till perpetuity even after any expiration or termination of this Agreement.

IN WITNESS HEREOF, and intending to be legally bound, the parties have executed this Agreement to make it effective from the date and year first written above.

Form 10: Description of Approach and Methodology in response to the Terms of Reference

Suggested structure of your Technical Proposal:

Technical Approach and Methodology: Technical Approach and Methodology covering at least:

- a) Understanding of SoW
- b) Approach and Methodology
- c) Work plan – deliverables and timelines

The proposed methodology and work plan shall be described as follows:

1. Understanding of TOR/SoW

The Bidder shall clearly state its understanding of the TOR and highlight its important aspects. The Bidder may supplement various requirements of the TOR and make precise suggestions if it considers this would bring more clarity and assist in achieving the Objectives laid down in the TOR.

2. Methodology and Work Plan

The Bidder will submit its methodology for carrying out this assignment, outlining its approach toward achieving the Objectives laid down in the TOR. The Bidder will submit a brief write up on its proposed team and organization of personnel explaining how different areas of expertise needed for this assignment have been fully covered by its proposal. In case the Bidder is a consortium, it should specify how the expertise of each firm is proposed to be utilized for this assignment. The Bidder should specify the sequence and locations of important activities and provide a quality assurance plan for carrying out the Engagement Services.

Note: Technical Approach & Methodology (Understanding, Approach, workplan) should not be more than 15 pages

Form 11: Format for Bank Guarantee

To,
Deputy Director General (DDG)
NAD, MoSPI
Khurshid Lal Bhawan,
Janpath, New Delhi – 110001.

WHEREAS the successful bidder (hereinafter called "the Bidder"), having its office at _____ has undertaken, in pursuance of Work order/LOI dated _____, to provide services under this RFP category.....to Ministry of Statistics and Programme Implementation (hereinafter called "the beneficiary") having its office at (NAD, MoSPI, Khurshid Lal Bhawan, Janpath, New Delhi – 110001).

And whereas it has been stipulated by in the said Work order/Letter of Intent no. _____ of Intent that the Bidder shall furnish a bank guarantee from a recognized bank for the sum specified therein as security for compliance with its obligations in accordance with the Work order/Letter of Intent issued dated _____.

And whereas we, _____ (Name of the Bank) a banking company incorporated and having its head /registered office at _____ (address of the registered office>> and having one of its offices at <<address of the local office) have agreed to give the supplier such a bank guarantee.

Now, therefore, we hereby affirm that we are guarantors and responsible to you, on behalf of the supplier, up to a total of INR _____ (Rupees _____) and we undertake to pay you, upon your first written demand declaring the supplier to be in default under the Work Order/Letter of Intent and without cavil or argument, any sum or sums within the limits of INR _____ (Rupees _____) as aforesaid, without your needing to prove or to show grounds or reasons for your demand or the sum specified therein.

We hereby waive the necessity of your demanding the said debt from the Bidder before presenting us with the demand. We further agree that no change or addition to or other modification of the terms of the Work Order/LoI issued to be performed there under or of any of the contract which may be made between you and the Bidder shall in any way release us from any liability under this guarantee and we hereby waive notice of any such change, addition, or modification.

This Guarantee shall be valid until _____ (Insert Date).

Notwithstanding anything contained herein:

- i) Our liability under this bank guarantee shall not exceed INR _____ (Rupees _____).
- ii) This bank guarantee shall be valid up to _____ period.

- iii) It is condition of our liability for payment of the guaranteed amount or any part thereof arising under this bank guarantee that we receive a valid written claim or demand for payment under this bank guarantee on or before _____ failing which our liability under the guarantee will automatically cease.

Name of Firm:

Address:

Annexure -1 (SUT)

The mapping used in Supply Use Table compilation should be integrated into the automated system:

- i) PFCE Mapping with SUT Products
- ii) HSC Mapping SUT Products
- iii) NPCMS/SS Code Mapping with SUT Codes

Additionally, data sourced from other Ministry /Departments to be incorporated (but not limited to) are, Goods and Service Tax (rates) from GST site, Annual Survey of Industries Data (ASI), Exchequer database of petroleum products from PPAC, EXIM database of DGCIS & International trade data of RBI.

Automatically check that all products and industries in the input match the official SUT code catalogue. Ingestion logic will validate each dataset against the official SUT product and industry codes (for example, using the approved NPCMS/NPCSS/NIC/ITCHS code lists) and flag or reject any invalid entries. Once ingested, data will be cleaned, transformed, and reconciled to fit the SUT framework. This involves standardizing formats, mapping classification codes, and applying valuation adjustments. The processing workflow will apply the following steps:

- a) **Data cleaning and standardization:** Use data libraries to normalize column names, handle missing values, convert units/currencies, and enforce data types. Leverage data libraries rich functionality to remove unwanted entries and reshape tables. Solution should have the features of data profiling, data cleansing, standardization and deduplication.
- b) **Classification mapping:** Crosswalk national product/industry codes to the SUT's fixed schema. For example, map 7-digit NPCMS codes (manufacturing products) and NPCSS codes (services products) to the 140 SUT commodity categories, and map 5-digit NIC codes to the SUT's 66 industry categories. (This may involve lookup tables or many-to-one aggregation logic.) Ensure consistency: each data element is linked to a known SUT product or industry.
- c) **Reconciliation:** Compare and balance the "supply" side (industry outputs) and "use" side (intermediate and final demands). Check that for each product, total supply equals total use (after accounting for inventory changes and trade). If imbalances occur, the system should flag them for review. Optional: run automated convergence routines or record discrepancies for human analysts.
- d) **Valuation adjustments:** Adjust trade and price figures to SUT pricing conventions.
- e) **Margin and tax calculations:** Apply domestic trade margins and net tax adjustments so that output is valued at basic price. Use business rules or external tables for tax and margin rates, logging any assumptions.

The system will automatically construct the Supply and Use matrices from the processed data and produce user-friendly reports. This includes generating the detailed SUT "supply table" and "use table" matrices (intermediate and final tables), as well as summary outputs and visualizations. The toolkit will assemble these matrices so that total supply equals total use for each product. Produce any intermediate balancing tables or National Accounts matrices as needed (for example, Input-Output tables derived from the balanced SUT).

Annexure -2 (Format of Pre-Bid Query)

Name of Bidding Entity:				
Contact Person:				
Contact Number/Email Id:				
S.No.	RFP Reference Page No.	RFP Clause No	Existing Clause Details	Clarification sought
1.				
2.				

Note: MoSPI will hold a Pre-Bid meeting on the scheduled date/time (no changes allowed), where only written queries in the prescribed format will be considered; up to two representatives per bidder may attend. Clarifications issued by MoSPI (including queries raised) will be posted on the GeM portal, binding on all bidders and forming part of the RFP. Bidders must submit responses without assumptions, oral references, or conditions, acknowledging full understanding of the RFP.

..... END OF DOCUMENT.....
